Macworld Exposition Program Guide

August 11-13, 1987

Bayside Exposition Center

Boston

Macworld Expo Sponsored by *Macworld* -
The Macintosh Magazine

Publish! Accelerates Into Second Year of Excellence

Publish!, the how-to magazine of desktop publishing, is celebrating its first anniversary with a special September issue. Come to **Macworld Expo booth #806** for a free copy of this much anticipated, product-oriented edition. It sports some highlights and a few "firsts," which will show you why *Publish!* truly leads the desktop publishing industry.

Publish! is written, edited, and designed on personal computer-based systems. That's how we stay on the cutting edge of this exciting technology and provide the expert guidance you need to establish and manage your own operation.

Publish! is your resource for unbiased, professional reviews, practical how-to articles, and the latest news in the fast-moving area of personal computer publishing.

Publish!

The How-to Magazine of Desktop Publishing

501 Second Street
San Francisco, CA 94107
415/546-7722

An IDG Communications Publication

Covering both Macintosh and IBM technology, *Publish!* answers *all* your questions about laser printers, scanners, word processors, page makeup programs . . . even the latest personal computer interfaces to commercial typesetting systems. We cover stand-alone systems as well as completely networked editorial systems. We show you production shortcuts and tricks of the technology, and teach you design, graphics, and other publishing fundamentals.

Find out why *Publish!* is the authoritative publication in its field. When you stop by our booth for your free September issue, pick up a *special show subscription card*. It entitles you to one year (twelve issues) of *Publish!* for just \$21.95.

Welcome

Welcome to MACWORLD EXPOSITION. It is with great pleasure that we once again bring you this extraordinary event from which you will have the opportunity to gather a vast array of knowledge regarding the Macintosh family of computers. MACWORLD EXPOSITION is proud to present you with more than 270 companies exhibiting their hardware, software, peripherals, and services for the Macintosh Community. Combine the SOLD OUT exhibit floor with our comprehensive three-day conference program and you can't go wrong. If it has to do with Macintosh, you will find it at MACWORLD EXPOSITION.

We would like to thank the exhibitors, speakers, and vendors who have helped make the MACWORLD EXPOSITION series of shows the largest Macintosh events in the world.

MACWORLD EXPOSITION and Mitch Hall Associates welcomes your participation and looks forward to a mutually successful three days.

Sincerely,

Mitch Hall
President
Mitch Hall Associates

MACWORLD EXPOSITION would like to thank the following for their generous contributions to the MACWORLD EXPOSITION Show Guide.

Cover Design: Holly Hudson, PC World Communications, Inc.; Cover Illustration: Matthew Foster, PC World Communications, Inc.; and Design and Production: Advanced Computer Graphics, Boston, MA.

AT 11:00 AM AUGUST 11, 1987 3Com BLOWS UP THE MACINTOSH NETWORK.

Today at MacWorld, big business finally gets the word on big mixed networks.

Now for the first time, users can create Macintosh or mixed Macintosh/IBM networks on a grand scale with 3Com's 3+ for Macintosh System.

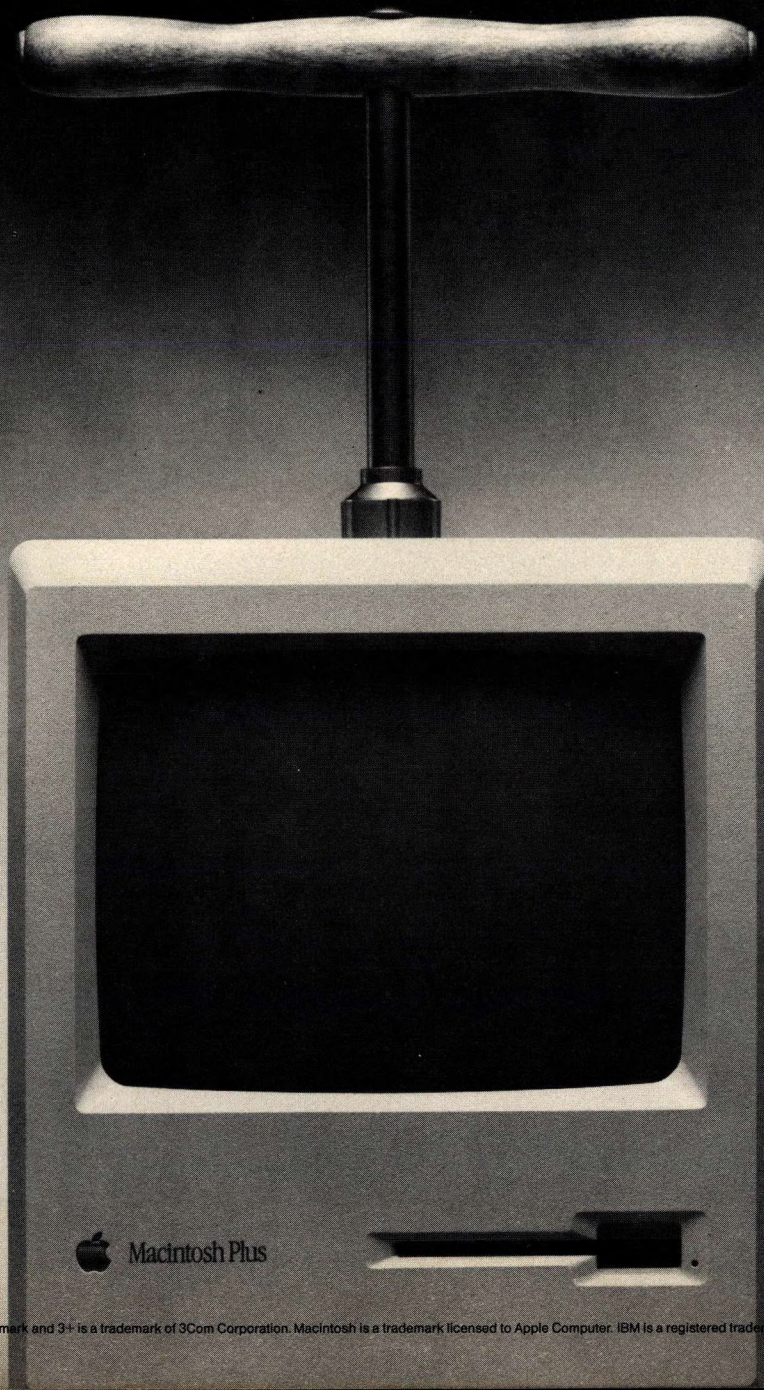

To find out just how big and powerful a network you can

build, and how much more versatile and productive that network can be, visit 3Com at Booth 1010.

If you don't, you'll miss the most explosive networking development of 1987.

Booth 1010

Macintosh Plus

Conference Program

Descriptions

TUESDAY, AUGUST 11
11:15-12:00

Session 1, Room H

Opening Session:

The Second Generation:

The Revolution Continues

John Sculley, President and Chief Executive Officer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

12:00-12:50

Session 2, Room E

Industry Forum:

The 1987 Software Developer's Guide (12:00-1:50)

As the Macintosh software market matures, a few clear rules have emerged for success in developing and publishing software — or at least the rules are clear when you have as much experience as these veteran panelists. You, too, can be launched on the road to fame and fortune in the software world, simply by attending this session and following the advice of our expert panel.

Adam Green, Author/Consultant, 118 Worthen Road, Lexington, MA 02173 [*Moderator*];

Charlie Jackson, President, Silicon Beach Software, P.O. Box 261430, San Diego, CA 92126;

Scott Knaster, Vice President, Engineering, Acius, Inc., 20300 Stevens Creek Boulevard, Suite 495, Cupertino, CA 95014;

Jim Rafferty, Chairman, Development, Cricket Software, Inc., 30 Valley Stream Parkway, Suite #1, Malvern, PA 19355;

Heidi Roizen, President, T/Maker Graphics, 2115 Landings Drive, Mountain View, CA 94043;

Dr. Andrew Singer, Vice President, Think Technologies, Inc., 420 Bedford Street, Lexington, MA 02173.

Session 3, Room H

Introductory Workshop:

Getting Started on Your Macintosh

For those users who are new to the Macintosh, this session covers setting up the Mac on your desk through organizing disks and files for the best use of the various hardware configurations. The System and The Finder are explained, as well as how to modify them to fit the user's

needs. Terms such as ROM, RAM, HFS, FKEY, and ID-02 are explained so that the new user can understand them. A user question and answer session will follow.

Andy Reese, Chairman, Apple Corps of Dallas, 11212 Indian Trail, Dallas, TX 75229-3585.

Session 4, Room F

User Seminar:

How to Create Professional Presentations

An exciting new dimension of the Macintosh is its ability to produce professional quality presentation materials. This session will explore the needs of frequent presenters and the methods that are currently being used to make presentations; discuss how the Macintosh architecture provides an ideal platform for presentations production; and provide an overview by leading vendors in this area, including discussions of applications software, desktop slidemaking, and service bureaus.

Dr. William L. Coggs, President, Desktop Presentations, Inc., 1260 L'Avenida, Mountain View, CA 94043 [*Moderator*];

Robert H. Campbell, President, Forethought, Inc., 250 Sobrante Way, Sunnyvale, CA 94086;

Amanda North, Marketing Manager, Desktop Presentations, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Robert T. Wall, Chairman and CEO, Presentation Technologies, Inc., 743 North Pastoria Avenue, Sunnyvale, CA 94086;

Peter Winer, Vice President, Product Development, Living Videotext, 2432 Charleston Road, Mountain View, CA 94043.

Session 5, Room G

User Seminar:

Medical Computing of the Future: *Paging Dr. Macintosh*

The use of Macintosh computers in clinical, research, and medical education settings is growing. User-friendly interactive technology and optical disk storage now permits easy access to enormous amounts of information. This session for health professionals and developers will discuss the microcomputing needs of the health professional, emphasizing medical education and information management. Two pioneering physician/developers will demonstrate programs representing the Macintosh-eye view of the future of medical education.

Scott Finley, M.D., M.P.H., Co-Director, Medi-Mac Health Users Group, The Boston Computer Society, Five Beals Street, Suite 1,

Brookline, MA 02146 [*Moderator*];

Bryan Bergeron, M.D., Senior Systems Analyst, Children's Hospital Medical Center, Harvard Medical School, 300 Longwood Avenue, Boston, MA 02115;

Lyndon S. Holmes, President, Aries Systems Corporation, 79 Boxford Street, North Andover, MA 01845;

Joseph Hutsko, Technical Advisor to the Chairman, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

1:00-1:50

Session 7, Room F

Introductory Workshop:

Getting Started in Word Processing

This session focuses on tools for writers, primarily word processing software. Featured is an overview of the types of products available to writers, including programs that help gather and organize information, outliners, word processors, and utilities such as spelling checkers. The emphasis will be on finding the right tools for a particular job.

David Szetela, Vice President and Editor, NIBBLE Publications, 45 Winthrop Street, Concord, MA 01742; and

Keith Thompson, President, Lexington Research, Inc., 9 Meriam Street, Suite 7, Lexington, MA 02173.

Session 8, Room H

Power User Session:

Power User Tips #1:

Getting the Most Out of Workgroup Computing

The Mac and AppleTalk have given rise to a new phenomenon in interpersonal/workplace communication: workgroup computing. With the introduction of network software such as AppleShare — along with networked mail, database, and word processing applications — Mac users can now actively share information and communicate electronically to solve problems. This session will offer tips on how to set up, organize, and administer workgroup systems to maximize communications while allowing for flexibility in personal work styles. Panelists will offer examples of some common workgroup solutions.

David Ushijima, Senior Technical Editor, Macworld, 501 Second Street, Suite 600, San Francisco, CA 94107 [*Moderator*];

Christopher C. Bryant, Marketing Manager, Desktop Communications, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Joseph Hutsko, Technical Advisor to the Chairman, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Build color into your graphics with an HP plotter.

Whether you're building sales revenues or designing new kitchens, Hewlett-Packard's family of color plotters will make your overheads and CAD drawings more effective. How? With the powerful advantage of high-impact color. An HP graphics plotter will turn your Macintosh into a color graphics powerhouse.

Build enthusiasm at your next presentation with vivid, high-quality overhead transparencies. And highlight important management reports with crisp, professional-looking charts and graphs. All easily prepared by any of HP's business graphics color plotters.

If you're designing parts or building up the skyline, color-coded

drawings in sizes A through E will make your designs easier to understand and execute. An HP DraftPro or DraftMaster plotter will quickly produce sharp, precise drawings on paper, vellum, or polyester film.

And all HP plotters integrate easily with your Macintosh and popular graphics software such as Microsoft Excel, Cricketgraph and MacDraft.

For a demonstration, see us at booth 137.

Conference Program

Descriptions

Guy Kawasaki, President, Acius, Inc., 20300 Stevens Creek Boulevard, Suite 495, Cupertino, CA 95014;

Steven M. Ullman, President, InterNet, 20 Amy Circle, Waban, MA 02167;

David Winer, President, Living Videotext, 2432 Charleston Road, Mountain View, CA 94043.

Session 9, Room G

User Seminar:

The Future of Macintosh Graphics and Animation

The technology we've been waiting for is here! Tools we could only dream about yesterday — color, big screens, faster processors, second-generation graphics software — are now at hand, and bode well for technological treats we can expect in the near future. This panel will demonstrate some of the creative possibilities in graphic imaging and interaction, and talk about potential directions for graphics and animation.

Erfert Nielson, Contributing Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107 [Moderator];

Jay Fenton, Staff Engineer, Vivarium Project, Apple Computer, Inc., 9155 West Sunset Boulevard, Los Angeles, CA 90069;

Marnie Morris, President, Animatrix, Inc., 2133 Yale, Palo Alto, CA 94306;

Erik Neumann, Programmer, MacroMind, Inc., 1028 West Wolfram Street, Chicago, IL 60657.

2:00–2:50

Session 12, Room F

Industry Forum:

Vertical Markets and VAR Solutions

This session is designed to give VARs and vendors a better perspective on the Macintosh as a specialized business tool. Panelists will address, from their vantagepoint, how the Macintosh can be adapted — using customized software developed by VARs — to meet the needs of specific vertical markets such as health care and real estate. Apple will discuss the vertical market niches its VARs are pursuing, including data on the markets and tools being developed as the Mac increases its penetration in small and medium businesses.

David Needle, Editor, *Computer Currents*, 5720 Hollis Street, Emeryville, CA 94608 [Moderator];

Erna Arnesen, VAR Channel Manager, Apple

Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

John DiBiasi, President, SoftWorks, Inc., P.O. Box 2285, Huntington, CT 06484;

Michael B. Edwards, President, Health Care Communications, Inc., 245 South 84th Street, Suite 300, Lincoln, NE 68510;

Patrick J. Morgan, President, *Electronic Publisher*, 215 South Street, Excelsior Springs, MO 64024.

Session 13, Room E

Introductory Workshop:

Getting Started in Networking

This session will feature an *AppleTalk Primer*, including how AppleTalk works, what can go wrong, and the costs inherent in an AppleTalk network. Major discussion will focus on specific AppleTalk applications, including IBM PC-to-Mac file transfers, file sharing among Macintoshes, multiuser applications, bridging hardware to networks and mainframe, and a look at electronic mail.

Russell Frye, President, ITCG Computer Systems, Inc., 1315 Eighth Street, Charlestown, MA 02129 [Moderator];

Rob Hafer, Director, Macintosh User Group, The Boston Computer Society, One Center Plaza, Boston, MA 02108;

Tracy Licklider, President, Ontio Computer Products, 1692 Massachusetts Avenue, Cambridge, MA 02138.

Session 14, Room H

User Seminar:

What's Available in Macintosh Accounting Software

Accounting software for the Macintosh holds considerable advantages over equivalent IBM products. This session will examine those advantages; provide an overview of currently available Mac accounting software; and discuss the significance of trends stimulated by the Mac interface. Single- and multi-user accounting solutions for managing small and medium-sized businesses will be provided.

Robert L. Haner, Jr., Manager, Peat, Marwick, Main & Co., 345 Park Avenue, New York, NY 10154.

Session 15, Room G

User Seminar:

How to Become a Power User

You're past the intermediate stage, but you haven't quite yet crossed the boundary into

power user status on your Macintosh; you know that your Mac can be quickly and easily customized to your specific needs, but aren't sure how to cause that to happen. This session will introduce you to that more sophisticated level of usage, focusing on such topics as: customizing your system fonts and desk accessories; resource editing; and simple file rescuing techniques.

Mark Loncar, Director and SIG Liaison, Los Angeles Macintosh User Group, 12021 Wilshire Boulevard, Suite 349, Los Angeles, CA 90025; and **Bob LeVitus**, Editor-in-Chief, *The Macazine*, 8008 Shoal Creek Boulevard, Austin, TX 78766.

3:00–3:50

Session 17, Room H

Industry Forum:

Mac Software: The Next Generation

As the Macintosh evolves into a powerful workstation-class machine, software developers have started to create new programming technologies and interface designs. In this session, four leading innovators will explore the next generation of Mac software tools and applications, and will offer sophisticated insights into the kinds of products that will dominate the market over the next few years.

Jeffrey Tarter, Publisher, *Softletter*, 1679 Massachusetts Avenue, Cambridge, MA 02138 [Moderator];

Stephen V. Burakoff, President, Layered, Inc., 85 Merrimac Street, Boston, MA 02144;

Marc Canter, President, MacroMind, Inc., 1028 West Wolfram Street, Chicago, IL 60657;

Adam Hertz, Systems Architect, Lotus Development Corporation, 55 Cambridge Parkway, Cambridge, MA 02142;

David Winer, President, Living Videotext, 2432 Charlestown Road, Mountain View, CA 94043.

Session 18, Room F

User Seminar:

Paint Software for the Mac

An exploration of features and techniques offered by Macintosh paint programs. Learn how you can take advantage of paint software to produce appealing illustrations and graphics. This panel demonstrates the powerful features of the leading paint packages and discusses new paint software directions on the horizon.

Adrian Mello, Senior Associate Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107 [Moderator];

Scott Berfield, Jack of All Trades, Mindscape, Inc., 3444 Dundee Road, Northbrook, IL 60067;

Charlie Jackson, President, Silicon Beach Software, Inc., P.O. Box 261430, San Diego, CA 92126;

Phil Lipetz, President, Ann Arbor Softworks, Inc., 5249 Lankershim Boulevard, North Hollywood, CA 91601;
Mark Zimmer, Partner, Fractal Software, Inc., 1747 Bagpipe Way, San Jose, CA 95121.

Session 19, Room E

User Seminar:

Relational Database Update, Part I: A Technical Overview

This summer's release of two powerful relational databases for the Macintosh — 4th DIMENSION and dBASE Mac — has spawned an evaluation frenzy among database users. Are these new products as hot as their public relations? How well do they stack up against the current leaders, Helix and Omnis 3? This two-part session will give you the answers to these vital questions.

In Part I: A sample multi-file invoice application will be demonstrated within each database, to give you a side-by-side comparison of all four programs. Special emphasis will be placed on the work involved in creating the application, the limits imposed by each database program, and the performance of the final application.

Adam Green, Author/Consultant, 118 Worthen Road, Lexington, MA 02173.

In Part II: This is your chance to meet the people behind the most powerful databases in the Macintosh market. In a free-wheeling, press-conference style session, you will discover how the publisher of each database plans to win control over this crucial portion of the Macintosh software market. (Part II will be held at 4:00 Tuesday, Session 24.)

Adam Green, Author/Consultant, 118 Worthen Road, Lexington, MA 02173 [*Moderator*];

Daniel Cheifetz, President, Odesta Corporation, 4084 Commercial Avenue, Northbrook, IL 60062;

Guy Kawasaki, President, Acius, Inc., 20300 Stevens Creek Boulevard, Suite 495, Cupertino, CA 95014;

Michael E. Kenny, President, Blyth Software, Inc., 2655 Campus Drive, Suite 150, San Mateo, CA 94403.

Conference Program Descriptions

Session 20, Room G

Advanced Workshop: MPW/MacApp Update

This session will bring you up to date on the latest developments in Apple's MPW and MacApp development system products. Particular emphasis will be placed on describing and demonstrating the new features of MPW 2.0 and MacApp 1.1. Future development plans for MPW versions 2.1 and 3.0 and MacApp 2.0 will be discussed. Plenty of time for your questions, too.

Kurt Schmucker, Technical Director, Educational Services Group, Productivity Products International, 27 Glen Road, Sandy Hook, CT 06482 [*Moderator*];

Harvey Alcabes, Product Manager, Developer Tools, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

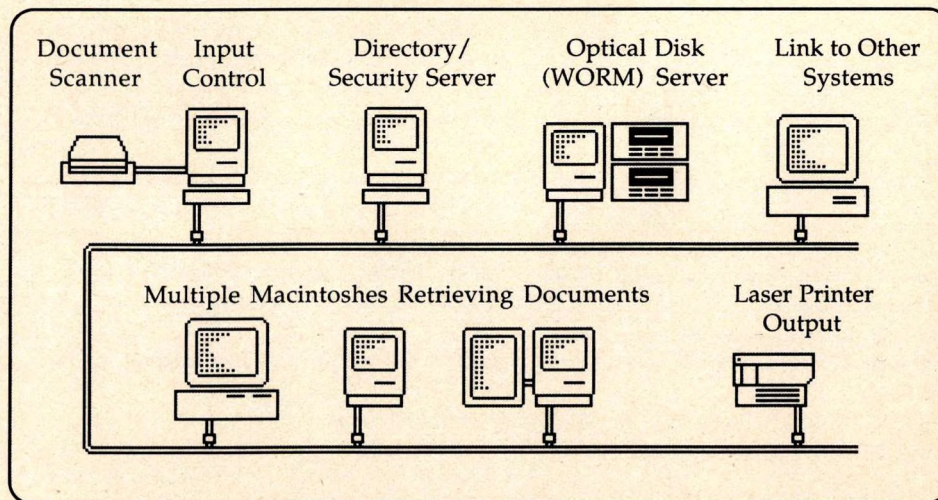

Dan Allen, Software Explorer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

4:00-4:50

Session 21, Room F

Industry Forum:

International Distribution and Marketing

A powerhouse of pointers for those interested in entering or presently working in the international market, including: How U.S. manufacturers and international distributors communicate directly and through third parties. How international distributors select and market products, and how U.S. manufacturers choose between international distributors. What are the similarities and differences between distributors from various countries. Pros and cons of having a U.S. or international office. How the U.S. manufacturer markets products through advertising in international magazines and other media. Why a product might succeed internationally but not domestically, and vice versa. New laws, trade legislature, and export licensing.

Randy Green, President, GreenTree Associates, Inc., One Faneuil Hall Marketplace, Boston, MA 02109 [Moderator];

William Chastka, Vice President, Washington Resources International, 1050 Connecticut Avenue, N.W., Suite 300, Washington, D.C. 20036;

Frank Cutitta, Managing Director of International Marketing Services, IDG Communications, P.O. Box 9171, Framingham, MA 01701;

Bernd Flurer, President, ALSO-ABC Trading, Muehlendamm 66, 2000 Hamburg 76, West Germany;

Gunnar Larsson, President, Software Plus of Scandinavia, Gamla Radstugugatan 31, S-600 02 Norrköping, Sweden;

Richard M. Laskey, Jr., President, Viking International, 325 Boston Post Road, Wayland, MA 01778;

Darragh M. Muldoon, President, Cricket Software, 30 Valley Stream Parkway, Suite 1, Malvern, PA 19355.

Session 22, Room G

Introductory Workshop:

Getting Started in Desktop Publishing

Desktop Publishing on the Mac offers a host of benefits, including control over production schedules, time savings, dollar savings, very quick payback period, a high return on investment, and vastly improved productivity. But choosing the right tools from what is now a confusing array demands some hard decisions. This session is designed to provide you with the background you'll need on the most popular desktop publishing products, including Apple's first and second generation Desktop Publishing solutions, along with tips, insights, and guidelines on how to choose the hardware and software that best meet your particular needs.

Susan Gubernat, Editor, *Publish!*, 501 Second Street, San Francisco, CA 94107 [Moderator];

Taylor Barcroft, Publisher and Editor-in-Chief, *MacBriefs*, P.O. Box 2178, Huntington Beach, CA 92647;

Lee Doliber, Principal, Doliber & Skeffington, 69 Dartmouth Street, Boston, MA 02116;

James Felici, Technical Editor, *Publish!*, 501 Second Street, San Francisco, CA 94107;

Marc Kaufman, Principal, Desktop Publishing & Design, 96 South Street, Boston, MA 02111.

Session 23, Room H

User Seminar:

The Mac and CD-ROM

What is CD-ROM? How does it work? What types of things is it being used for? What do hypertext and multimedia mean? What are the advantages of Macintosh and CD-ROM? The answers to these commonly-asked questions (and more!) will be provided in this insightful seminar, whose goal is to educate end users about CD-ROM technology, how the technology is presently being used with the Macintosh, and how the industry experts see it being used in the future.

Denise Caruso, Opinions Editor, *Macintosh Today*, 501 Second Street, San Francisco, CA 94107 [Moderator];

Marc Canter, President, MacroMind, Inc., 1028 West Wolfram Street, Chicago, IL 60657;

Roy Endries, President, Multi-Ad Services, 1720 West Detweiller Drive, Peoria, IL 61615;

Andy Poggio, Manager, Optical Media, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Session 24, Room E

User Seminar:

Relational Database Update, Part II:

Meet the Publishers

This summer's release of two powerful relational databases for the Macintosh — 4th DIMENSION and dBASE Mac — has spawned an evaluation frenzy among database users. Are these new products as hot as their public relations? How well do they stack up against the current leaders, Helix and Omnis 3? This two-part session will give you the answers to these vital database questions.

In Part II: This is your chance to meet the people behind the most powerful databases in the Macintosh market. In a free-wheeling, press-conference style session, you will discover how the publisher of each database plans to win control over this crucial portion of the Macintosh market.

5:00-5:50

Session 27, Room F

The Macworld Expo User Group Extravaganza (MUSE),

Part I: THE USERS SPEAK OUT — WHAT'S HOT AND WHAT'S NOT

If you haven't yet joined a user group, this is the place to come to see first-hand the kinds of benefits you can expect from being a member. If you already belong to a user group, you'll especially enjoy this session, which will bring together representatives of user groups nationwide for a massive userfest. The purpose of the MUSE sessions is to provide a completely unbiased, knowledgeable source of information on the best, the brightest, the most useful, and the most exciting products on the *Macworld Expo* show floor.

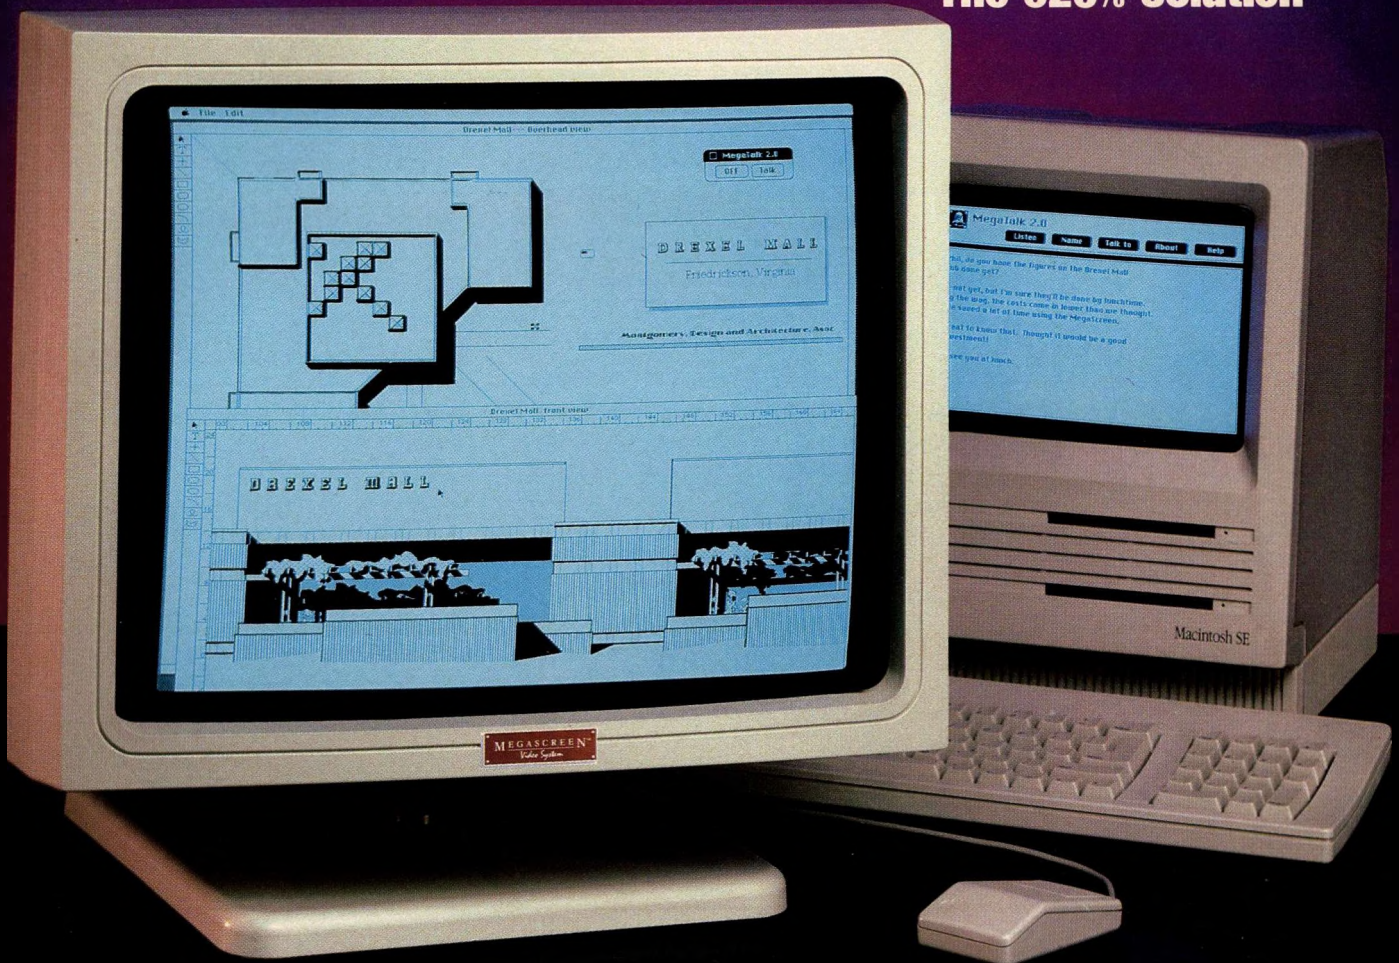

In today's session: Hear what regular users have to say about the state of the Mac community and the new products at the *Macworld Expo*. Stop by and just listen — or speak out yourself!

Jack Hodgson, Founding Director, BCS•MAC, One Center Plaza, Boston, MA 02108 [Moderator];

MegaScreen™

The 526% Solution

MegaScreen's 19.5" monitor gives you 526% more design space than your Macintosh™ Computer. Compatible with all standard Macintosh software, MegaScreen lets you see drawings, designs, page spreads, spreadsheets, and just about everything you ever wanted to see, larger. 526% larger.

MegaScreen's dual-screen features allow you to run MegaTalk Electronic Mail on your Macintosh screen — the same time. MegaScreen concentrates on your primary application while letting those important messages flow through to you.

MegaScreen is the most flexible, user-definable video device available. Your local Apple® dealer can install MegaScreen for your Macintosh SE, Macintosh Plus or Macintosh 512kE — usually in less than 15 minutes. You might even add enhancement options, such as co-processors, speed cards and other video outputs.

Ask your dealer for a demonstration, or give us a call. You'll see why MegaScreen is still the best-selling Macintosh large screen system.

Session 28, Room E

Bill Atkinson Demonstrates Apple's New HyperCard Software

This panel of developers of Apple's new HyperCard hypermedia toolkit, led by Bill Atkinson of MacPaint fame, will demonstrate the program and its uses, and talk about how and why Apple created HyperCard. Some notable early users of HyperCard will describe their experiences with this exciting innovation, and provide a forecast of HyperCard products they expect to see.

Bill Atkinson, Apple Fellow; and **Chris Espinosa**, Product Manager, Systems Software, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014 [Moderators];

Fabrice Florin, President, Worldview Communications, 624 Cabrillo Street, San Francisco, CA 94118;

Danny Goodman, Contributing Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107;

Edmond C. Kelly, Jr., Editorial Manager, CD Consumer Division, Microsoft Press, 16011 N.E. 36th Way, Redmond, WA 98073;

Dan Winkler, Engineer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

WEDNESDAY, AUGUST 12

11:15-12:00

Session 31, Room F/G

Special Session:

Are Personal Computers There Yet?

Jean-Louis Gasee, Executive Vice President, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

12:00-1:50

Session 32, Room F/G

Keynote Panel Discussion:

The Macintosh in the Future

A blue-ribbon panel of experts will examine and analyze the Macintosh's current status, with an eye toward future growth, likely directions, and developments for which you should start preparing *now*. A sampling of topics to be discussed includes: Will Apple be a success in the corporate world? Is the Macintosh getting too complicated? What will be the likely impact of the Macintosh II? A critical perspective for all Macintosh users and potential users!

David Bunnell, Editor-in-Chief, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107 [Moderator];

Fritz R.S. Dressler, President, FRS Dressler Associates, 103 Waterford Circle, Wallingford, PA 19086;

George Everhart, Director, Business Marketing, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Philippe Kahn, President, Borland International, 4585 Scotts Valley Drive, Scottsdale, CA 95066;

Guy Kawasaki, President, Acius, Inc., 20300 Stevens Creek Boulevard, Cupertino, CA 95014;

Jonathan Rotenberg, President, The Boston Computer Society, One Center Plaza, Boston, MA 02108;

Sherman Uchill, President, Sherman Howe Computer Stores, 110 Cedar Street, Wellesley, MA 02181.

2:00-2:50

Session 33, Room E

Introductory Workshop:

The Beginner's Guide to Programming Languages

This introductory session will discuss the variety of programming languages available for the Macintosh: the advantages, disadvantages, and applications of each; pitfalls to avoid; and an overview of available software packages.

Dr. David A. Lingwood, Executive Director, Apple Programmer's and Developer's Association, 290 S.W. 43rd Road, Renton, WA 98055.

Session 34, Room H

User Seminar:

How to Start and Survive in Business on Your Macintosh

With dozens of ways to make money on your Macintosh, the rewards — and the risks — can be enormous. This session describes the creative use of the Macintosh as a business tool, including practical, usable guidelines that *work*. To be covered: Forms of Organization; How to Incorporate; Practical Planning and Financing; Marketing Strategies; and a variety of ways to save money during your startup. A *must* for aspiring entrepreneurs.

F.L. Mike Harvey, President and Publisher, *NIBBLE* Publications, 45 Winthrop Street, Concord, MA 01742.

3:00-3:50

Session 35, Room F

User Seminar:

The Mac Clinic

This special panel of Mac "doctors" has been assembled specifically to answer your questions about the Macintosh, in terms of both hardware and software. The session will begin with answers to the most commonly-asked questions (e.g., *how to avoid disk swaps; how to shortcut common Mac procedures; how to use disk caches and RAM disks*, etc.). An open Q&A session with the audience will follow. This is the place to bring all the Mac questions you've been storing up because you didn't know who to ask!

Cynthia Harriman and **Ben Calica**, Authors and Editors, *The Macintosh Advisor*; and **Jack Hodgson**, Founding Director, Macintosh User Group, The Boston Computer Society, One Center Plaza, Boston, MA 02108.

Introducing Design.

The first thinking tool for both sides of your brain.

Now there's a powerful graphics and text handling program to help you visualize complex systems.

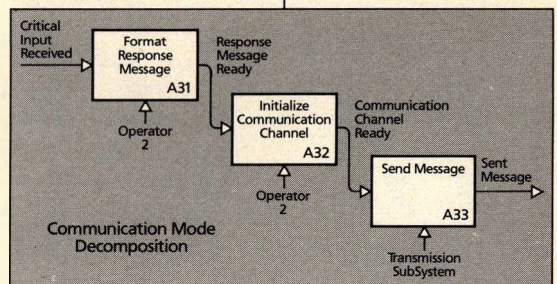

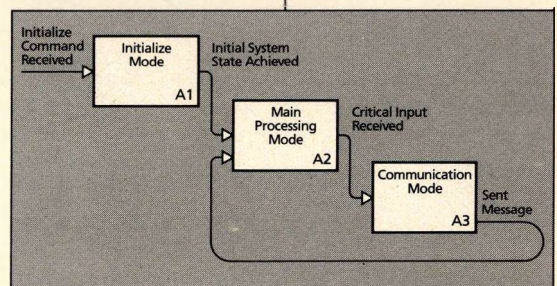

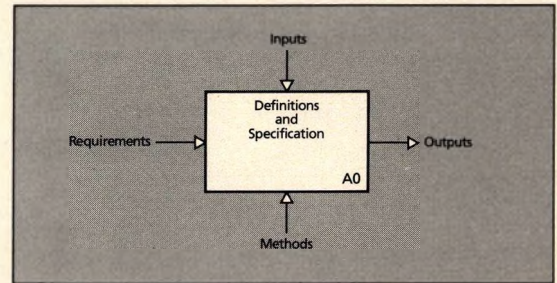

Design lets you create understandable graphic representations of projects and processes on your Macintosh™. So you can organize quickly, analyze effectively, and communicate clearly.

Draw flow charts, organizational charts, computer programs, communication networks, presentation graphics and production line processes—in record time. Once you connect one object to another in a diagram, it stays connected, no matter where you move it. *Design* makes it easier to establish, maintain and understand logical relationships.

Build *Design* diagrams up to 999 pages. And arrange them in hierarchical structure. You can also develop successively detailed descriptions within one multi-level diagram. Or hide detail, so the big picture is easier to see. Even edit, manipulate and stylize text inside any graphic object. And create "hypertext" links to organize text across multiple pages.

What's more, you can always upgrade to *Design* development systems from Meta Software. *Design + DA* lets you write Macintosh™ Desk Accessories, mini-applications that extend the power and capabilities of *Design*. And *Design Open Architecture* is a programmable system for developing final applications.

That's the verbal description of what *Design* can do. For a more graphic illustration, look to your right.

Why just draw graphics, when you can draw conclusions?

For more information about *Design*, or for the name of the dealer nearest you, mail this coupon to Meta Software Corporation, 150 CambridgePark Drive, Cambridge, Mass., 02140. If you can't afford to wait, call us at 800-227-4106. In Massachusetts, call 617-576-6920.

**Finally, a
PostScript[®] printer
that gets the max
output from your
Mac's input.**

The CG 400-PS has 70,000 more dots per square inch than standard laser printers.

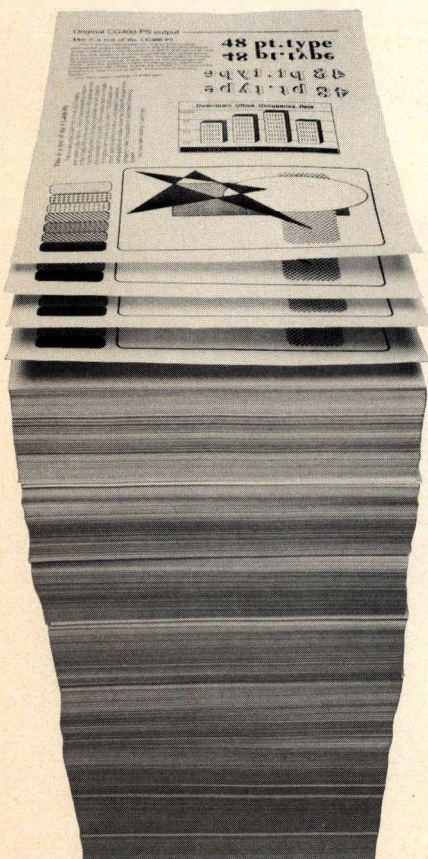

Introducing the CG 400-PS PostScript plain-paper printer.

The new CG 400-PS from Compugraphic is designed for maximum performance in PostScript® plain-paper printing. With its output resolution of 400 dots per inch, it offers 160,000 dots of resolution, instead of the 90,000 dots on the LaserWriter.™ That means outstanding reproduction of complex text and graphics.

Unlike the LaserWriter, the CG 400-PS writing element is a solid-state LED array with no moving parts, drastically reducing

At up to 18 pages per minute, the CG 400-PS is more than twice as fast as most desktop printers.

This is a test of the C

With 400 dpi, the CG 400-PS delivers superior quality plain-paper text and graphics.

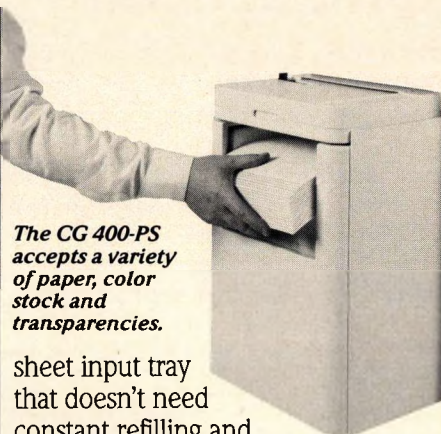

engine wear and maintenance and radically improving precision and quality. This means it has a high output speed of up to 18 pages per minute, yet it can handle a monthly volume of up to 100,000 pages.

When it comes to creativity and flexibility nothing comes close to the CG 400-PS. In addition to 13 typefaces on its powerful Atlas Raster Image Processor, the 400-PS comes loaded with 60 additional PostScript typefaces on its 20 MB hard disk. And of course the CG 400-PS is from Compugraphic, the leading source of typographic and publishing systems in the world.

The CG 400-PS offers unparalleled throughput and production features. It has a standard 2000-

Conference Program

Descriptions

Session 36, Room H

User Seminar:

Desktop Communications Overview

Desktop communications puts high-level communication power on the desktops of non-technical business users in a way they can understand and put to good use. This session takes a look at the latest developments and future trends in Apple and its third-party community activities in desktop communications, discussing such key areas as: using your Macintosh in local area networks, as an intelligent workstation, in a mainframe environment, and as a window into the world of information utilities.

Daniel Farber, Industry Editor, *Macintosh Today*, 501 Second Street, San Francisco, CA 94107 [Moderator];

John Bacon, Vice President, Marketing, PC Communications Group, Digital Communications Associates, 1000 Alderman Drive, Alpharetta, GA 30201;

Dick Fontana, President, DataViz, Inc., 16 Winfield Street, Norwalk, CT 06855;

Peter Friedman, Desktop Communications Marketing Manager, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Nat Goldhaber, President, Centram Systems West, Inc., 2560 Ninth Street, Suite 220, Berkeley, CA 94710;

Carl Gritzmaker, President, Migent, Inc., 865 Tahoe Boulevard, Incline Village, NV 89450-6062;

Guy Mariande, Vice President, Sales and Marketing, Tangent Technologies, Inc., 5720 Peachtree Parkway, Norcross, GA 30092;

Dr. Andrew Singer, Vice President, Think Technologies, Inc., 420 Bedford Street, Lexington, MA 02173.

Session 37, Room G

Advanced Workshop:

New Adventures in Programming

This code-bashing session, designed for advanced programmers, would-be hackers, and the exceedingly curious, will demonstrate programmer subtleties, teach you how to use the secret hooks in the Macintosh system, and show you the hidden details of the Macintosh ROM. The purpose: to share experiences on how to create applications that are faster, better, and more fun. To add to the hacker's delight, famous Mac programmers will present their favorite hacks.

David Smith, Editor and Publisher, *MacTutor*, 1237 Bering, Placentia, CA 92670 [Moderator];

Scott Boyd, Computer Scientist, MacHax Group, 3420 Sandra D, Bryan, TX 77801;

Steve Jasik, President, Jasik Designs, 343 Trenton Way, Menlo Park, CA 94024;

Greg Marriott, Computer Scientist, MacHax Group, 3420 Sandra D, Bryan, TX 77801.

Session 38, Room E

User Seminar:

All About 4th DIMENSION

Everything you need to know to get into 4th DIMENSION, a new Macintosh relational database featuring programming language and MacDraw-like layout graphics, plus run-time and multiuser capability. The demonstration will be followed by an open question-and-answer session.

Guy Kawasaki, President, Acius, Inc., 20300 Stevens Creek Boulevard, Suite 495, Cupertino, CA 95014.

4:00-4:50

Session 42, Room F

Introductory Workshop:

The Beginner's Guide to Graphics

If you're anxious to get started with creating great artwork and luminous illustrations on your Mac, this session will provide an excellent launching pad. Includes: A look at the graphics applications most important to a beginner (FullPaint, MacDraw, SuperPaint, and Com-icWorks) — what they do, how they're different, and how to use their features. Understanding the distinction between bit-map and object-oriented images. How clip-art libraries are another way to produce graphics (especially for users who have no graphics talent). How Thunderscan fits in as a beginning graphic tool. And more.

Tom Santos, Owner, A-Z Mobile Graphics, 109 Dwight Street, San Francisco, CA 94134.

Session 43, Room G

User Seminar:

Computer-Aided Design on the Mac

This session will provide an overview of how the Macintosh is being used in the field of computer-aided design — both 2D and 3D design and drafting. The moderator will present an overview of available products for both applications. Leading products (in terms of

installed base and leading-edge applications, respectively) will be demonstrated by Innovative Data Design ("MacDraft") and Visual Information, Inc. ("Dimensions"). A third product will be demonstrated, but remains unannounced at press time.

Jerry Borrell, Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107 [Moderator];

Paul King, President, Innovative Data Design, 2280 Bates Avenue, Suite A, Concord, CA 94520;

Nick Pavlovic, President, Visual Information, Inc., 16309 Double Grove, La Puente, CA 91744.

Session 44, Room E

Power User Session:

Power User Tips #2:

Advanced Tips and Tools For Desktop Publishing

If you've decided to get serious about desktop publishing, you need more than a passing familiarity with page layout programs and the LaserWriter. This session will provide an overview of second-generation desktop publishing solutions for advanced DTP applications, and help you: learn about scanners, video digitizers, and big screens; find out about the next round of layout software and the influence of PostScript; and pick up a few tips for getting the most from your LaserWriter.

Keith Thompson, President, Lexington Research, 9 Meriam Street, Suite 7, Lexington, MA 02173 [Moderator];

Barbara Macy, Principal, The Desktop Design Group, 973 Main Street, Springfield, MA 01103;

Conrad Willeman, Principal, Desktop Publishing & Design, 96 South Street, Boston, MA 02111.

Session 45, Room H

User Seminar:

Mac Hardware: Making the Smartest Choices

Since the Macintosh family is now so disbursed, from the Mac 512 to the Mac II, which Mac model should you buy, and why? How much memory should you have? Do you need a hard disk? If so, how big a hard disk do you need, and which kind should you buy? What kind of printing device do you need—laser? dot matrix? typeset? Do you need a modem? What will it/won't it do for you? Should you get external floppy drives, or should you get two floppy drives built in with the SC? Good, solid advice and help will be provided in these areas, along with the opportunity to get your questions answered.

Rich Coulombre and **Rick Kollmeyer**, Co-Founders, The Support Group, P.O. Box 2778, Quincy, MA 02269.

Session 47, Room F

The Macworld Expo User Group Extravaganza (MUSE),

**Part II: THE USERS SPEAK OUT —
WHAT'S HOT AND WHAT'S NOT**

If you haven't yet joined a user group, this is the place to come to see first-hand the kinds of benefits you can expect from being a member. If you already belong to a user group, you'll especially enjoy this session, which will bring together representatives of user groups nationwide for a massive userfest. The purpose of the MUSE sessions is to provide a completely unbiased, knowledgeable source of information on the best, the brightest, the most useful, and the most exciting products on the *Macworld Expo* show floor.

In today's session: Hear what regular users have to say about the state of the Mac community and the new products at the *Macworld Expo*. Stop by and just listen — or speak out yourself!

Jack Hodgson, Founding Director, BCS•MAC, One Center Plaza, Boston, MA 02108
[Moderator];

Douglas Baldwin, Member of the Board, National Macintosh Computer Society, P.O. Box 8589, Coral Springs, FL 33065;

Danny Goodman, Contributing Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107;

Edmond C. Kelly, Editorial Manager, CD Consumer Division, Microsoft Press, 16011 N.E. 36th Way, Redmond, WA 98073;

Dan Winkler, Engineer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

THURSDAY, AUGUST 13 11:15-12:00:

Session 51, Room H

Special Session:

Success in Software: The Next Decade

William V. Campbell, President and COO, Claris Corporation (An Apple Software Subsidiary), 20525 Mariani Avenue, Cupertino, CA 95014.

12:00-12:50

Session 52, Room F

User Seminar:

Music on the Mac

The Macintosh has already become the personal computer of choice for many musicians, with its exceptional ability to play, display, interactively edit, and print standard musical notation. This session provides a state-of-the-art look at music on the Mac, highlighted by a musical demonstration.

Nancy E. Dunn, Associate Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107 [Moderator];

Professor Jon Appleton, Director, Bregman Electronic Music Studio, Dartmouth College, Hanover, NH 03755;

Donald A. Byrd, President, Advanced Music Notation Systems, 12 Concord Street, Maynard, MA 01754;

Mark Lentczner, Sound Engineer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Session 53, Room H

User Seminar:

The Mac and The Mainframe

This panel is aimed at Macintosh users for whom mainframe connectivity is important. It will cover both Apple's strategic direction in host communication (AppleTalk for VMS, SNA one-network strategy, and OSI), as well as an overview of existing capabilities in several host environments, along with a look at which products do what best. The discussion will include the Macintosh's abilities to communicate with IBM, DEC, Wang, UNIX, Northern Telecom, and other environments.

Ted Leonsis, President, Redgate Communications Corporation (Publisher, *Macintosh Buyer's Guide*), 660 Beachland Boulevard, Vero Beach, FL 32963 [Moderator];

Al Cini, President, Computer Methods Corporation, 525 Route 73 South, Suite 300, Marlton, NJ 08053;

Peter Hirshberg, Marketing Manager, Desktop Communications, Apple Computer, Inc. 20525 Mariani Avenue, Cupertino, CA 95014;

Dwight Holmburg, President, Omnigate, Inc., 351 California Street, Suite 1000, San Francisco, CA 94104;

Tom Lenahan, Digital Communications Associates, 1000 Alderman Drive, Alpharetta, GA 30201;

Robert J. Van Andel, Director, 3270 Product Development, Avatar Technologies, Inc., 99 South Street, Hopkinton, MA 01748.

Session 54, Room G

Power User Session:

Power User Tips #3: Customizing Your System

The Macintosh's system software has an amazing flexibility that can be easily harnessed to make the Mac reflect your personal preferences and habits. Learn how to add command-key shortcuts to any menu in any program you own; see how to install your own FKeys; and find out about some especially powerful and useful desk accessories that help you "have it your way." No need to be a technical wizard to unlock the power of your Mac.

Ben Calica, Author, *The Macintosh Advisor*, 66 Walnut Street, Somerville, MA 02143; and

Rob Hafer, Director, Macintosh User Group, The Boston Computer Society, One Center Plaza, Boston, MA 02108.

We didn't make to have great ideas. Just infinitely ea

Ever since paper replaced cave walls as man's favorite vehicle for expression, the attempt to communicate ideas has been an enduring source of frustration.

That frustration has just been eased dramatically.

Because Letraset introduces Ready, Set, Go! 4.0—an enhanced version of what *InfoWorld* called “the new champion among Macintosh desktop publishing programs.”

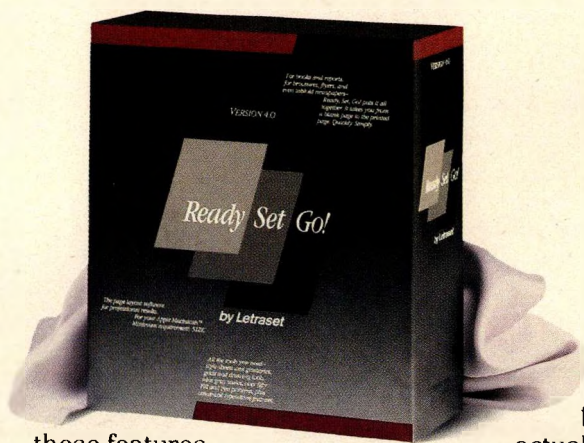

Simply put, Ready, Set, Go! 4.0

is the easiest, fastest, most creative way yet devised of helping you organize, visualize and edit your thoughts onto professional-quality pages.

In fact, it removes any meaningful distinction between what you can do at your desk and what might otherwise require large budgets, long lead times and a studio full of designers.

The technically inclined will be pleased to note that it has

it any easier easier to express them.

a unique block architecture that enables you to envision the finished page before it's finished.

Integrated word processing with real-time hyphenation that lets you create and design text and image simultaneously. Plus such essential tools as arbitrary runarounds, custom page sizes, style sheets and support for high-resolution graphics.

For those more concerned with the ultimate outcome of

these features, Ready, Set, Go! 4.0 will help you make a raw concept blossom into a newsletter of finished elegance. Transform random brainstorming into a report of symphonic coherence. Or create a dazzling business presentation from a jumble of brilliant insights.

And although other software packages may talk about doing all this, Ready, Set, Go! 4.0 is

the only one that can actually put it down on paper.

For more information, including the location of your nearest authorized Letraset graphic design software dealer, just call (800) 722-0377. If you purchase Ready, Set, Go! 3.0 between June 1-August 11, you receive an upgrade at no charge.

Conference Program Descriptions

Session 55, Room E

User Seminar:

Multimedia HyperCard: The Imagination's Power Tool

This session will demonstrate remarkable scenarios made possible by the fabulous new HyperCard, as viewed by a film producer, a television producer, and a publisher. Developers will find this session of particular interest, especially new potential developers who are trained in video presentations and graphic arts. Educators will also find the presentation useful, as will general audiences interested in CD-ROM and Videodisc.

Dr. Inabeth Miller, Special Assistant for Technology, Boston Museum of Science, Science Park, Boston, MA 02114 [*Moderator*];

Dr. Sueann Ambron, Manager of Education Technology Development, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Stephen Arnold, General Manager, Games Division, Lucasfilm Ltd., 5858 Lucas Valley Road, Nicasio, CA 94946;

John Cole, Vice President, CD-ROM, Grolier Electronic Publishing, 95 Madison Avenue, New York, NY 10016;

Dr. Kristina Hooper, Senior Research Designer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Rob M. Lippincott, Director, Interactive Technologies, WGBH Educational Foundation, 125 Western Avenue, Boston, MA 02134.

1:00-1:50

Session 57, Room F

User Seminar:

The Mac in the Law Office

All you really need to know about bringing the Macintosh into your law office and maximizing its use once you get it there, including: how to plan for and install Macs; hardware configurations; connecting Macs and MS-DOS machines; local area networks and telecommunications; and practical advice on making software selections and purchasing word processing, database, time and billing, and presentations software.

James Burger, Esq., Chief Counsel/Government, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014 [*Moderator*];

Paul Goodman, Esq., Attorney-at-Law, 140-17 Einstein Loop North, The Bronx, NY 10475;

Peter Hart, Esq., President, Legalware, Inc., 33

Yonge Street, Suite 1120, Toronto, Ontario, Canada M5E 1S9;

Thomas Warrick, Esq., Attorney-at-Law, Pierson Semms & Finley, 2054 31st Street, N.W., Suite 300, Washington, D.C. 20007.

Session 58, Room E

User Seminar:

The Future of Desktop Publishing on the Mac

Where does desktop publishing go from here? To help you strategize for the future, this session will present: the outlook for desktop publishing and how it will affect you; who the major players are now — and who is likely to be in the future; what you should do *today* to be ready to capitalize on tomorrow's developments.

Tony Bove and **Cheryl Rhodes**, Editors, *Desktop Publishing*, P.O. Box 620025, Woodside, CA 94062 [*Moderators*];

Richard Amen, President, DEST Corporation, 1201 Cadillac Court, Milpitas, CA 95035;

Paul Brainerd, President, Aldus Corporation, 411 First Avenue South, Suite 200, Seattle, WA 98104;

Fred Ebrahimi, President, Quark, Inc., 300 South Jackson, Suite 1, Denver, CO 80209;

James Klauber, Vice President, Marketing, Letraset U.S.A., 40 Eisenhower Drive, Paramus, NJ 07653;

Alain Rossmann, Director of Sales and Marketing, Radius, Inc., 1050 East Duane Avenue, Suite F, Sunnyvale, CA 94086;

John Scull, Desktop Publishing Marketing Manager, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Robert Simon, President, PS Publishing, 290 Green Street, Suite 1, San Francisco, CA 94133;

John Warnock, President, Adobe Systems, Inc., 1870 Embarcadero Road, Palo Alto, CA 94303.

Session 59, Room G

Advanced Workshop:

The Developer's Tool Kit

An invaluable assortment of programming tips, insights, and tried-and-true tricks of the trade for writing applications for the Macintosh, including an inside look at compilers, debuggers, and more.

Steven L. Brecher, Owner, Software Supply, 599 North Matilda Avenue, Suite 210, Sunnyvale, CA 94086 [*Moderator*];

Dan Cochran, Manager, Developer Tools, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Jim Friedlander, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Scott Knaster, Vice President, Engineering, Acius, Inc., 20300 Stevens Creek Boulevard, Suite 495, Cupertino, CA 95014;

Bryan Stearns, Senior Developer Support Engineer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Session 60, Room H

User Seminar:

Connecting the Mac to the DEC World

Connecting your Macintoshes to a DEC host can unify your office computing. This session will explore: why one would want to integrate the two environments; what's possible today; the architectures that make connectivity possible, along with their implications; how to choose the products that best fit your needs; and more.

Alfred J. Mandel, Executive Vice President, Redgate Communications Corporation, One China Basin Building, Suite 6300, 185 Berry Street, San Francisco, CA 94303 [*Moderator*];

Al Cini, President, Computer Methods Corporation, 525 Route 73 South, Suite 300, Marlton, NJ 08053;

Jonathan Cohler, Editor-in-Chief, *Digital Review*, 800 Boylston Street, Suite 1390, Boston, MA 02199;

Robert B. Denny, President, Alisa Systems, Inc., 221 East Walnut, Suite 230, Pasadena, CA 91101;

Peter Hirshberg, Marketing Manager, Desktop Communications, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

David Ryter, Vice President, Marketing, Pacer Systems, Inc., 1900 West Park Drive, Suite 280, Westboro, MA 01581;

Sam Solon, President, White Pine Software, Inc., 94 Route 101A, Amherst, NH 03031.

2:00-2:50

Session 62, Room F

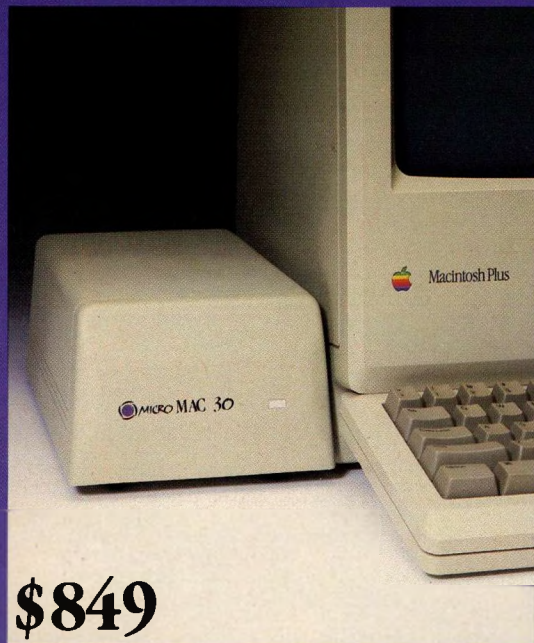

Introductory Workshop:

The Beginner's Guide to Databases

Does database jargon confound you? Let an experienced Mac database guru demystify the subject for you. Learn the essentials, the important terminology, and how to evaluate the database program to fit your data management needs.

Ben Calica, Principal, Tools for the Mind, 66 Walnut Street, Somerville, MA 02143.

While other manufacturers are making the claims... Microtech delivers the facts!

\$849

\$189

A lot of manufacturers are out there claiming to be the first, the fastest, the smallest, the quietest, etc. . . . Microtech, as one of the "first" drive manufacturers in the Macintosh market, when only a handful existed, could prove many of these claims false, but rather than make claims, we prefer to devote our time and expertise to delivering our customers the facts.

● MICRO MAC 30 A 30 megabyte SCSI hard drive equipped with dual ports for daisy-chaining along with an external dip switch for quick and easy address changes. **Coming soon: Micro MAC 45.**

SPEED Few drives in its class can match or beat the Micro MAC 30's speed; none for the price.

SUBTLETY Fitting snugly beside your Mac Plus, measuring only 3 1/4" x 5 1/2" x 8", the Micro MAC 30's unique subtle profile will not overstep your Mac boundaries. Sound sensitive Mac enthusiasts will appreciate Micro MAC 30's quiet subtlety as well.

SECURITY A special "Micro Lock" feature auto parks and locks the Micro MAC 30's heads in an area not used for data storage, securing your data from loss or damage.

● MICRO MAC 800 You saw it first, as the Mac535, at the Boston '85 Macworld Expo, in the pre-Mac Plus days.

SATISFACTION The Micro MAC 800 floppy disk drive, soon to enter its "3rd" year of production has long been satisfying Mac users of all sizes--128k, 512k, and Mac Plus--with its versatility and reliability. Now even quieter than ever, at a new low price.

● NOVA 20, 30 or 50 The Nova series SCSI drives offer the same extra features as the Micro MAC 30 including "Micro Lock", daisy-chaining and external dip switch - all with an added bonus . . .

SAVINGS	Compare and Save . . .
NOVA 20	 \$569
NOVA 30	 \$689
NOVA 50	 \$999

*Microtech delivers

The DataDesk MAC-101™ Captures The Power of the Macintosh.™

DataDesk MAC-101™

High Performance Keyboards For All Macintoshes

Finally, Hands-On Word Processing For The Macintosh.

For years now, everyone has been looking for a way to use the Macintosh computer in the high-speed data input environment associated with corporate word processing, spreadsheet and desktop publishing applications. Lured by promises of more speed, more power.

Now there is a solution. The DataDesk MAC-101 for the Macintosh 512K & Plus computers, and the MAC-101/ADB, for the new Macintosh SE & Macintosh II computers; the first high performance keyboards for the Macintosh.

The MAC-101 keyboards, with their 101-key layout and full complement of function keys, instantly increases your productivity by giving you easier access to the powerful features of all Macintosh software programs, *without moving your hands from the keyboard!*

Everything You Need. At Your Fingertips.

The DataDesk MAC-101 keyboards bring many firsts to the Macintosh. Foremost are the user-definable Function and Page Control keys. Now you can assign all of your commonly used menu items, keyboard commands, and mouse movements for any Macintosh program to a single key. No longer are you forced to interrupt your typing to reach for the mouse!

Engineered For Faster, Easier Typing.

The MAC-101 incorporates a professional "industry standard" layout and low-profile enclosure that meets all DIN standards making it the perfect solution for standardizing offices with both PCs and Macs. The positive-tactile feedback keys give you a "touch and feel" that lets you type faster with fewer mistakes—regardless of the software you're running!

Automate.

With Easy-To-Crete Macros.

The DataDesk MAC-101 keyboards not only enhances the full range of the Macintosh's capabilities—they add to the list. MAC-101 includes 101 KEYS™, a comprehensive macro software desk accessory program which provides unlimited one-key operation for all of your software.

With the MAC-101's macro utility even a novice can quickly design macros that instantly execute multi-step tasks, reduce complex commands and program functions to a single keystroke. The MAC-101 will customize and automate your programs so you can work more efficiently and productively than ever before.

Corporate & Institutional Purchases Available.
Two-Year Warranty; 30-Day Money-Back Guarantee.

"It's about time the Mac had a decent keyboard."

Jerry Pournelle, Byte Magazine
April 1987

"I recently had a chance to use . . . DataDesk's 101-key keyboard. The result was superb."

Bill Machrone, Editor PC Magazine
January 27, 1987

"For ingenuity of design and sheer dollar value, DataDesk is very hard to beat."

Washington Post
May 21, 1987

"A professional keyboard that exploits Microsoft Word 3.0 and the Macintosh's capabilities to the fullest."

Jonathan Prusky, Product Manager,
Microsoft

Session 63, Room E

User Seminar:

Desktop MTV

The open Macintosh II brings a wealth of new opportunities to hardware companies who want to create cards for the Nubus bus. One such opportunity is the professional video/film/music business — most professional work in these entertainment fields is computerized, and there's no reason why a Quantel Paint box, an Ampex ADO, a Synclavier or Wavefront animation system cannot be implemented inside a Macintosh II. "Desktop MTV" alludes to a standalone, professional multimedia workstation based around a Mac II. The software and hardware needed for this type of workstation includes color paint programs, frame buffers, scanners, digitizers, gen-locking, 2D and 3D animation, signal processors, bit blitters, accelerators, MIDI, music composition and notation programs, and most of all, some way to interface and synchronize these different media together with SMPTE time code. In this session, panelists who share a background in both the computer industry and the video and/or music industries will paint an insightful picture of the possibilities.

Marc Canter, President, MacroMind, Inc., 1028 West Wolfram Street, Chicago, IL 60657 [Moderator];

James W. Armstrong, Hardware Evangelist, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Stephen Beck, President, Beck/Tech, Inc., P.O. Box 5027, Berkeley, CA 94705;

Jan Lewis, President, Palo Alto Research Group, 1020 Corporation Way, Palo Alto, CA 94303.

Session 64, Room H

User Seminar:

The Higher Education Mac Marketplace

The higher education marketplace has become a hotbed of activity relative to personal computing, with an increasing awareness by many vendors as to how important this market is now and can be in the future. Not only has the market heated up relative to the microcomputer for student and faculty purchase, but also for the advanced academic workstation for faculty research. In this session, Apple's Higher Education Marketing Manager Bud Colligan will share his thoughts on Apple's position in the marketplace; as well, he will discuss technology leadership, academic tools and solutions, innovative support programs, and the network of educators.

John (Bud) Colligan, Higher Education Marketing Manager, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Session 65, Room G

Power User Session:

Power User Tips #4:

How Do I Connect My Mac to _____?

A practical, "how-to" discussion of generic connection strategies. This session will focus on off-the-shelf hardware and software to connect Macintoshes to: DEC, Wang, EtherNet, DECnet, TCP/IP, SNA, broadband, baseband, ASYNC, LAN, WAN, bridging, gateways, protocols, Sun, IBM, Computervision, CIMlinc, Sigma, Unix, VMS, RS232, TOP, MAP, coax, twisted pair, fiber optics, 3270, HP, Tandem.

Kee Nethery, Technical Manager, Farallon Computing, Inc., 1442A Walnut Street, Suite 64, Berkeley, CA 94709 [Moderator];

Doug Foster, CIM Communications Networks, John Deere Industrial Equipment, P.O. Box 538, Dubuque, IA 52001;

David Kosiur, Editor and Publisher, Connections, P.O. Box 5894, Fullerton, CA 92635;

Chris Lincoln, Apple Computer, Inc., 181 Litton Avenue, Palo Alto, CA 94301.

3:00–3:50

Session 67, Room E

User Seminar:

Enhancing the Power of AppleTalk

This panel of several key developers in the AppleTalk arena will discuss such topics as: AppleTalk compared to other nets; how to develop for and maximize the use of AppleTalk; how AppleTalk is not just printer cable any more; *Name That Network!*; IEEE 123 XYZ; and more. In addition, panelists will answer questions from the floor, as well as questions drawn from a drop box at the speaker office.

Guy Mariande, President and Founder, AppleTalk Developers Association; and Vice President, Sales & Marketing, Tangent Technologies, Inc., 5720 Peachtree Parkway, Norcross, GA 30092 [Moderator];

Alex Gernert, Product Marketing Manager, Tri-Data, 505 East Middlefield Road, Mountain View, CA 94043;

Reese Jones, President, Farallon Computing, Inc., 1442A Walnut Street, Suite 64, Berkeley, CA 94709;

Steven R. Nelson, Marketing Manager, Kinetics, Inc., 2500 Camino Diablo, Suite 110, Walnut Creek, CA 94596;

Conference Program Descriptions

Scott Schnell, AppleTalk Product Line

Manager, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Dr. Gursharan Sidhu, Manager, Network Systems Development, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Session 68, Room F

Open Forum:

Meet the Programmers

An open forum discussion with leading programmers who have developed programs for the Macintosh. Don't miss this opportunity to ask questions of these dynamic crowd-pleasers, to share your thoughts and excitement, and to gain meaningful insights and feedback on development ideas!

Donald Brown, Programmer, CE Software, 801 73rd Street, Des Moines, IA 50312;

Steve Chernicoff, Author and Famous Hacker, c/o Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Jan Eugenides, Technical Editor, NIBBLE MAC, 45 Winthrop Street, Concord, MA 01742;

Andy Hertzfeld, Software Wizard, c/o Radius, Inc., 404 East Plumeria, San Jose, CA 95134;

Terry Lucas, Software Engineer, Think Technologies, Inc., 420 Bedford Street, Lexington, MA 02173;

Duane Maxwell, Vice President, Software, LEVCO, 6160 Lusk Boulevard, Suite C-203, San Diego, CA 92121;

Scott Watson, President, FreeSoft, 10828 Lacklink, St. Louis, MO 63114;

Scott Wiener, Ann Arbor Softworks, Inc., 5249 Lankershim Boulevard, North Hollywood, CA 91601.

Session 69, Room G

User Seminar:

Engineering Solutions for the Macintosh

This session explores the host of today's and tomorrow's possibilities presented by the Macintosh as a workstation, featuring: the strengths and weaknesses of the Mac workstation, and its future in scientific and engineering environments; a look at the Mac as a front end to mainframe computers; and an overview of engineering applications, including mechanical design, architectural design, and solid modeling.

Dr. Prasad Kaipa, Radio Biology Division, University of Utah, 2011 Highland View Circle, Salt Lake City, UT 84109 [Moderator];

Michael Boich, President, Radius, Inc., 404 East Plumeria, San Jose, CA 95134;

Conference Program Descriptions

Kevin Curran, President, General Computer Corporation, 215 First Street, Cambridge, MA 02142;

Steven Edelman, President, SuperMac Technology, 950 North Rengstorff Avenue, Mountain View, CA 94043;

Irene F. Ortiz, Market Development Manager, Hewlett-Packard Company, Inc., 16399 West Bernardo Drive, San Diego, CA 92127.

Session 70, Room H

User Seminar:

UNIX on the Mac: What's New? What's Now?

UNIX is a multiuser, multitasking operating environment with an exceptionally full set of system resources and impressive file handling utilities. UNIX on the Mac is fraught with opportunities, pitfalls, and surprises — as this session will clearly show.

Rory O'Connor, Associate News Editor, *Macintosh Today*, 501 Second Street, San Francisco, CA 95014 [Moderator]; [Panel to be announced, in keeping with the ethereal nature of UNIX!]

4:00–4:50

Session 72, Room F

User Seminar:

The Mac in Education

A look at the exciting role the Macintosh is playing on college campuses in Engineering, Science, and the Liberal Arts, along with a peek at what's on the drawing board for K-12 educators in the future. Also on the agenda: how the Mac is faring in the art and science of educational administration.

Dr. Prasad Kaipa, Radio Biology Division, University of Utah, 2011 Highland View Circle, Salt Lake City, UT 84109 [Moderator];;

Valerie Kuletz, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107;

Douglas Green, Director, Computer Services, Binghamton City Schools, 98 Oak Street, Binghamton, NY 13905.

Session 73, Room E

User Seminar:

Maximizing Macs and IBMs in the Same Office

Having IBM PCs and Macintoshes in the same office provides a truly mind-boggling panorama of business opportunities. Conversely, this fabulous opportunity can also be a colossal headache, tantalizing users with potential that can't be realized due to problems of connectivity and compatibility. This session provides a forum for leading-edge users to describe steps they have taken to overcome the dilemma, vent their aggravation over thorny problems to which no solutions have yet been found, and share their ideas with leading industry figures on what should be done in the future.

5:00-5:50

Session 77, Room F

Macworld Expo User Group Extravaganza (MUSE), Part III:

User Group Director's Manual: Tricks, Traps, and Techniques for Starting and Running a User Group

If you haven't yet joined a user group, this is the place to come see first-hand how you can go about joining one — or starting your own. If you already belong to a user group, you'll especially enjoy this session, which will bring together a panel of user group reps with Apple's User Group Connection and *Macworld* staff writers, thus providing an indisputably reliable source for users to share information, compare tips and strategies, discuss their concerns and problems, and get hard-hitting answers to questions.

In today's session: Getting volunteers, publishing a newsletter, dealing with the vendors, support from Apple, relating to the press, how to achieve non-profit status, the problems and benefits of big vs. small groups. These subjects and more will be covered in this concise guide to effectively running a Macintosh user group, including a status report from Apple's User Group Connection Team.

Jack Hodgson, Founding Director, BCS•MAC, One Center Plaza, Boston, MA 02108

[Moderator];

Nancy Dunn, Associate Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107;

Charlie Jackson, President, Silicon Beach Software, P.O. Box 261430, San Diego, CA 92126;

Reese Jones, President, Berkeley Macintosh User Group, 1442A Walnut Street, Suite 64, Berkeley, CA 94709;

Ellen Leanse, Program Manager, Apple User Group Connection, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014;

Matt Snyder, Special Assistant to the Chairman, Apple Corps of Dallas, 2708 Rollingdale, Farmers Branch, TX 75238;

Becky Waring, Editor, *The Active Window*, BCS•MAC, One Center Plaza, Boston, MA 02108.

[The MUSE is a complimentary service provided to all Macworld Expo attendees; it is not restricted to those who have purchased a conference ticket.]

Session 78, Room E

Bill Atkinson Demonstrates Apple's New HyperCard Software

This panel of developers of Apple's new HyperCard hypermedia toolkit, led by Bill Atkinson of MacPaint fame, will demonstrate the program and its uses, and talk about how and why Apple created HyperCard. Some notable early users of HyperCard will describe their experiences with this exciting innovation, and provide a forecast of HyperCard products they expect to see.

Bill Atkinson, Apple Fellow; and **Chris Espinosa**, Product Manager, Systems Software, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014 [Moderators];

Fabrice Florin, President, Worldview Communications, 624 Cabrillo Street, San Francisco, CA 94118;

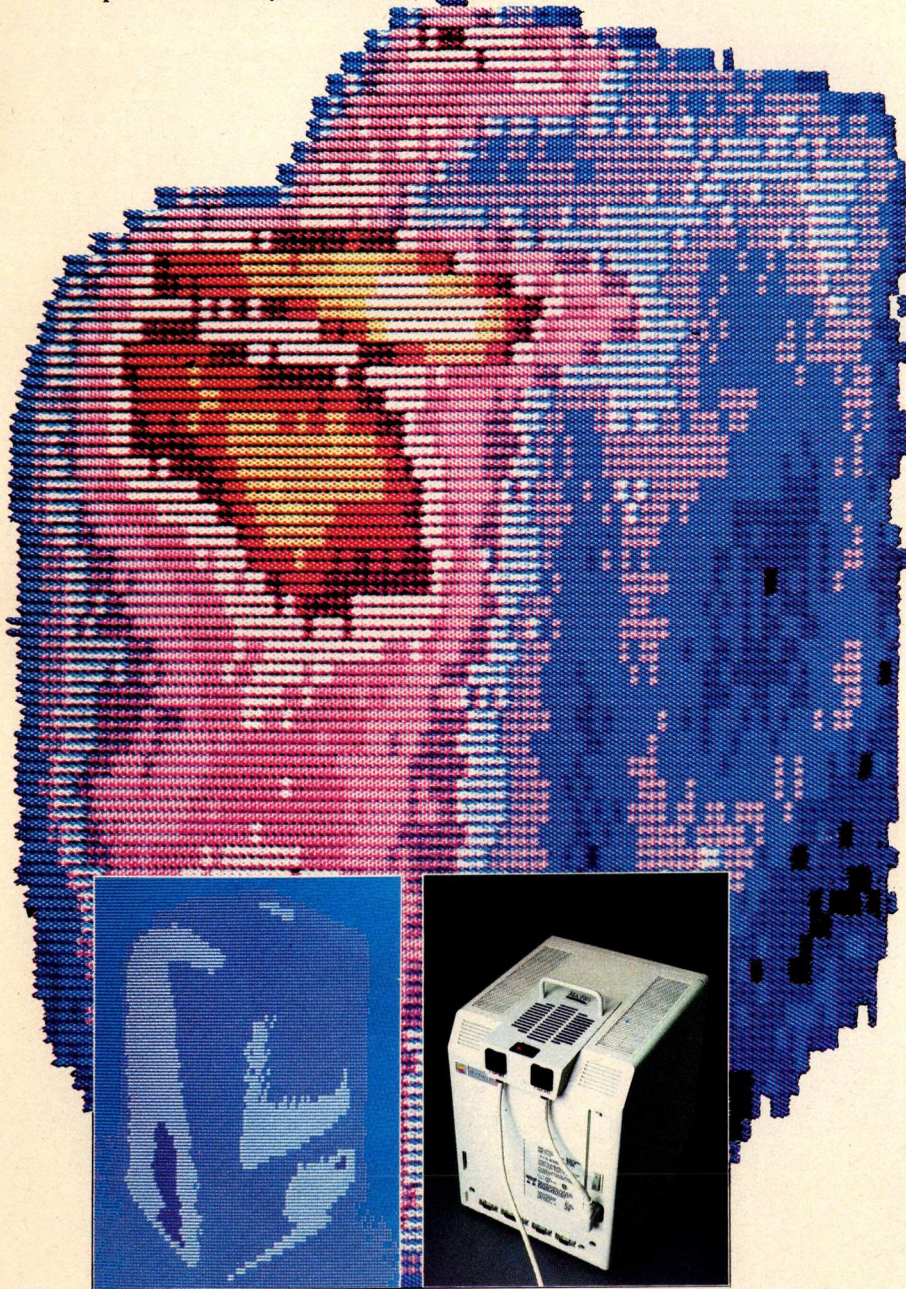

Danny Goodman, Contributing Editor, *Macworld*, 501 Second Street, Suite 600, San Francisco, CA 94107;

Ed Kelly, Editorial Manager, CD Consumer Division, Microsoft Press, 16011 N.E. 36th Way, Redmond, WA 98073;

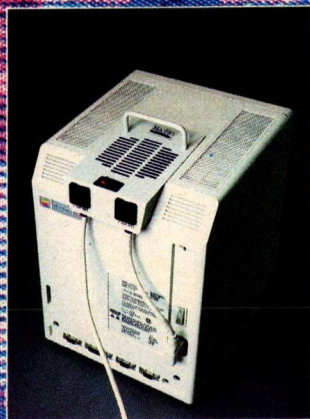

Dan Winkler, Engineer, Apple Computer, Inc., 20525 Mariani Avenue, Cupertino, CA 95014.

Is your Mac suffering from terminal overheating?

Heat-sensing thermograph reveals dangerously high temperatures: up to 137°F externally, 180°F internally.

MacFan cools internal components by 58° to a safe 122°F.

Keep your cool with MacFan™

You might not know it until it's too late, but your Macintosh™ could be burning up inside. Because even with normal use, high operating temperatures will shorten the life of your components – or burn out your circuit board entirely. Unless you're protected by MacFan.

Quiet good looks.

MacFan cools your Mac continuously with fresh, forced air. It's quiet, compact and so well designed, it won't affect the clean lines of your terminal. Just slide it on and plug it in. You still have a sturdy carrying handle. And a Mac that fits perfectly in its original carrying case. So you only lose heat – not portability.

Two outlets, total control.

Once installed, MacFan becomes your computer control center. It has two rear outlets (7 amps each) for your printer, hard drive or other accessories. A top-mounted power switch controls both your Macintosh and peripherals.

Automatic surge protection, too.

MacFan also eliminates the danger of permanent computer damage and data loss from power line surges and fluctuations. No need to pay extra for add-on surge protectors.

Compatible and affordable.

MacFan fits the Macintosh 128k, 512k, all upgrades and Hyperdrive™. Although it can save you far more in repairs and data loss, it costs only \$129.95. So don't run the risk of terminal burn-out. Order MacFan today.

Call toll-free 1-800-468-3577.

In Illinois, call 312/647-0564.
MasterCard, Visa and American Express accepted.

MacFan™

9. Padded Handle for Comfort, features Velcro Enclosure.
10. 2" Stiff Nylon Webbing Maintains Shape.
11. Slip Stop Shoulder Pad.
12. Outer Handle to Assist in Shoulder Carrying.

Your future is history.

The business software you've wanted for your Macintosh has been running on the IBM PC for years. It's written in dBASE, but now you can run it on your Macintosh.

With McMax™

McMax runs dBASE programs up to 10 times faster and gives you an outstanding choice of existing applications. Accounting, order entry and inventory control systems. Time billing, estimating and taxes. Payroll, personnel and mailing lists. Just transfer what you need to your Mac and it's yours.

If you'd rather do it yourself, you'll find that McMax is just what you need.

Pull-down menus and an Assist mode help you manage your data with no programming experience. And whenever you want to, you can take control with a rich set of English-like commands that you use interactively or in your own custom programs.

Whatever your mind can conceive, McMax makes it easier to achieve. It's the business database management standard, made better. To learn more, write Nantucket Corporation, 12555 Jefferson Blvd., Los Angeles, CA 90066.

Or call (213) 390-7923 today. Because today, McMax means business.

 Nantucket.

McMax™
means business.

In Europe: Nantucket Corporation (Europe) 2 Bluecoats Avenue, Fore Street, Hertford, Herts SG14 1PB Telephone 0992 554621.

Win a Mac SE!

Stop by and take a spin on the Omnis database. Other prizes include Mac bags, external hard drives, single user Omnis 3 Plus/Express, Multiuser Omnis, SmartPad (Blyth's new desktop accessory), Omnis Executive Assistant, and more.

IT'S NO GAMBLE.

Win big at the Omnis Lottery and come see what's new at Blyth

Everybody's a winner with Omnis. When you buy Omnis to run your business, you're buying the Macintosh database standard... the proven, fast, flexible database program currently in use in some of the largest companies in the world, including Apple Computer.

And now, the power of Omnis is more accessible than ever. Come by and see new Omnis *Express*... the frontend to Omnis which allows everyone to quickly and easily create their own business solution—complete with screen layouts,

menus and report-generation capabilities—without the tedious development time and programming typical of other programmable Macintosh databases. And, without giving up the customization features or multiuser choices of Omnis.

Or choose an application already developed in Omnis available through the many Omnis Developers and Development Centers, several of whom are exhibiting here at MacWorld under the banner "Omnis Business Programs." Come get

your directory of Omnis Business Solutions and we'll point you toward the solution for you.

Like Circo Business Solutions' MDA, multiuser desktop accounting. Or MAC AD/C's work/maintenance tracking and accounting program for contractors. Or Synapse's Omni-MED, a medical office management program or DRG Tracking, a hospital client tracking and payment solution. Or Tomoe Trading's multiuser system for sales and inventory tracking in Japanese. Or Spectra Blue's MRP, inven-

tory control solution for manufacturers or MacJewel, an accounting program for independent jewelers, or S.I.P.S., a sales inventory purchasing system. Or visit Kevin J. Doyle Consulting, one of the Omnis Development Centers who can provide a custom Omnis solution, complete with installation and training.

BLYTH SOFTWARE

What You *Want* Is What You Get In One Program

Desktop Publishing Quality

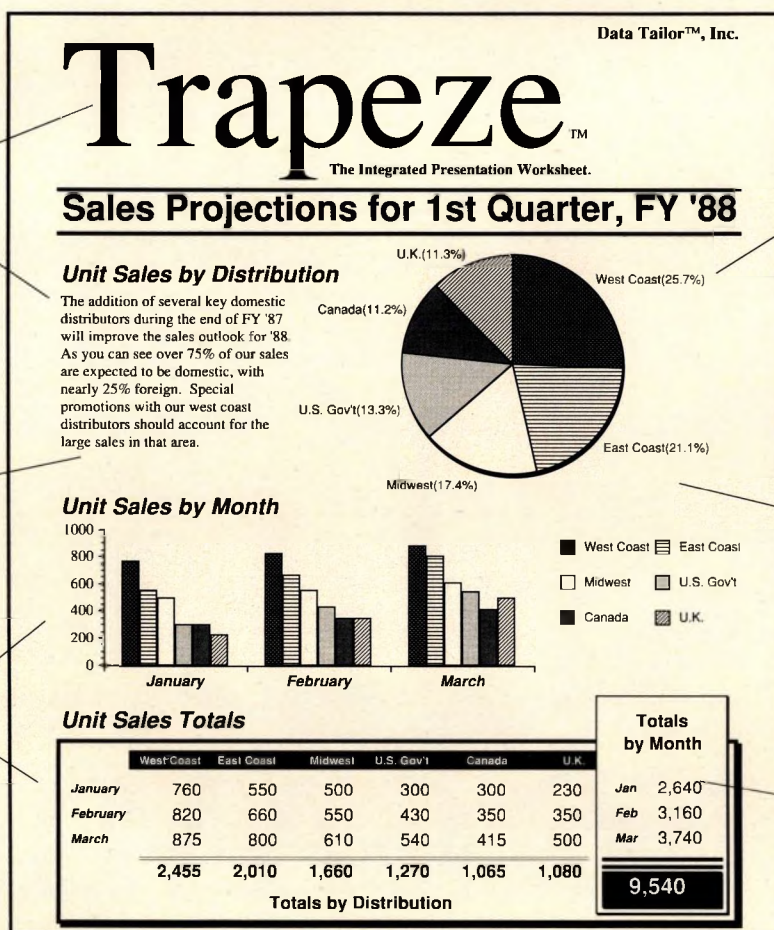

Trapeze lets you use any Macintosh™ font, style, size or color in any block of information, and mix them on a single worksheet. Combining graphics and layout capabilities with powerful data analysis adds a whole new dimension to desktop publishing.

Everything On One Worksheet

Put calculations, text, pictures and charts all on the same worksheet—no need to import from other programs. And have up to 32 worksheets open at the same time.

"Live" Information

No longer are last-minute changes a problem, because your information remains active. Make additions, deletions or "what-if" changes to your data as often as you wish. Trapeze will update every related block of information, including charts. No other program offers this powerful capability.

This output was created in one worksheet, on one page, with one program: Trapeze.

Flexible, Automatic Charting

Trapeze offers automatic charting functions which surpass even dedicated "chart and graph" programs. Eleven basic chart types are built-in, with thousands of variations possible with a simple click or two of the mouse. And if your information changes, Trapeze updates all related charts automatically.

Power You Control

No matter how complex the data, Trapeze provides the powerful functions you need for analysis. Yet, you retain complete freedom to manipulate the information and its presentation.

Integrated Presentation Worksheet

The result is a clear, eye-catching representation of your information that can make the difference between selling your ideas and sitting on them. Only Trapeze gives you a presentation-quality worksheet in one, integrated program.

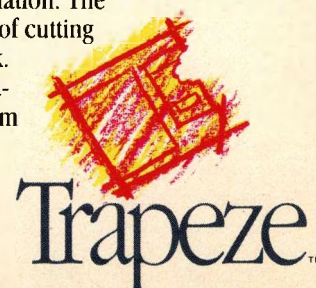

A lot of programs are promising that what you see on the screen is what you'll get in the output. The problem is that by the time you get all of your information on the screen, what you see may no longer be what you want. Perhaps you made a change in your spreadsheet and forgot to change a related chart. Or maybe the text doesn't reflect your most recent information. The only way to make changes is to return to the original program, make the changes, and then do a lot of cutting and pasting between programs to get it all on one worksheet again. Not exactly a quick and easy task.

Trapeze offers an alternative: the first truly integrated presentation worksheet. It combines spreadsheet, data analysis, text, charting and graphics capabilities in a single program—and lets you perform any or all of them on a single worksheet without the hassle of juggling several programs at once.

We believe that Trapeze 2.0 is the most powerful and flexible presentation worksheet on the market. And we believe that, once you try it, you'll agree. In fact, we'll refund your money if you return it within 30 days.

Visit your local dealer today for a demo or call us at 1-800-443-1022. Stop settling for what you see—get what you want with Trapeze.

Minimum system requirements: enhanced Macintosh 512K with 800K external drive. Runs on Macintosh versions 512e, Plus, SE and Mac II (in color!). Supports Laserwriter™ and ImageWriter™ I and II.

Adobe Systems, Inc.
1870 Embarcadero Rd.
Palo Alto, CA 94303

Adobe Systems, the developers of POST-SCRIPT™, will be featuring Adobe Illustrator™ and introducing their newest product, Adobe Separator™. Shown for the first time, the Adobe Separator is a desk accessory which creates color separations of Adobe Illustrator files. The Separator divides an Illustrator file into 4 process color components (cyan, magenta, yellow and black), then prints them to any PostScript printer or typesetter. The Separator is specially suited for high resolution PostScript typesetters, where final camera ready negatives or positive films can be prepared for printing. The Adobe Illustrator gives users the ability to combine the control and fine detail of drawing by hand with the speed and mathematical precision of the computer. A scanned image becomes the template for creating high-quality line art and illustrations. Adobe Illustrator has the power of POSTSCRIPT to manipulate illustrations, preview on the screen, and output to any PostScript printer. Adobe Systems will also be showcasing their newest release of AdobeTypefaces.

Advanced Computer Graphics, Inc. 1330
1260 Boylston Street
Boston, MA 02215
617/437-6470

Advanced Computer Graphics is Boston's premier Desktop Publishing and typesetting service company, featuring professional imagesetting from Postscript-compatible files, knowledgeable customer support, and an award winning computer-aided graphic design group. Our staff draws its expertise from a demanding, hands-on production environment utilizing the latest in desktop publishing composition and imaging technology. ACG's in-house Linotronic Imagesetters insure superior quality, fast turnaround and low per page rates for files created on a wide variety of microcomputer, minicomputer and mainframe systems. ACG supports over 150 typefaces (including the entire Adobe typeface library), and is conveniently located for easy access to and from downtown Boston and outlying areas. ACG also provides 24-hour access via modem and same day delivery. Output is available on high quality resin coated paper or acetate film (positive or negative).

Please see our advertisement on page 89

Tempo II is the next evolutionary step in Tempo 1.2, the Macintosh's main macro maker. Tempo II adds window-relative recording of mouse clicks, autopaste macros, smart menu macros, universal macros (especially good for DAs and the extended keyboard), and Tempo pop-up menus. AffiniFile offers you fast access to your notes and graphics through a powerful and comprehensive index. Each topic may have up to 5000 words of text, and you may attach a full page of graphics to each topic. AffiniFile's automatic Topics Index allows you to store thousands of topics and subtopics alphabetically. Both for all Macs, 512K and up.

		Altsys Corp. 720 Avenue F, Ste. 108 Plano, TX 75074 Altsys is showing Fontographer, their professional PostScript font editor, FONTastic Plus, for editing screen and ImageWriter fonts, and an impressive collection of fonts.	239	Anatex, Inc. 1801 Ave. of the Stars, Ste. 507 Los Angeles, CA 90067 Personal Writer 15 is the first handwriting recognition system for Macintosh users. Whether you want to write text, input figures or create graphics, you simply write on paper and your words appear typewritten on the computer screen instantly. Add, delete and correct with the flick of your pen. PW15's powerful character recognition software learns to read your handwriting. Composed of a digitizer, stylus and software, PW15 is fully compatible to most software (word processing, database management, spreadsheet, graphics).	459

Watch your data take human forms.

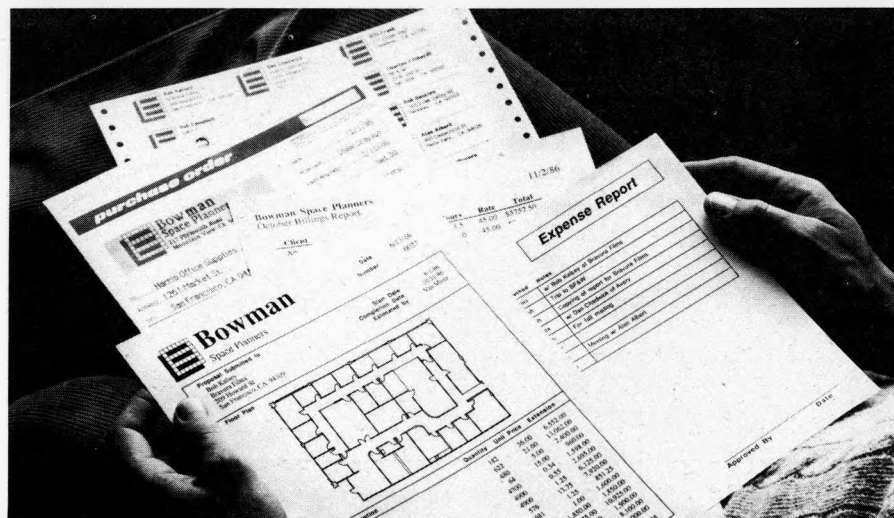

FileMaker Plus from Forethought.

Now, the only Mac database ever to get both *Mac User's* and *InfoWorld's* highest ratings does even more, with even more ease.

Ordinary forms like mailing labels, purchase orders, invoices, credit memos, packing lists or expense reports. Hard selling forms like proposals and quotations.

FileMaker Plus lets you do these any way you want. And in addition to doing what a database is supposed to do—calculations, summary reports, sorting—FileMaker Plus does everything you wish a database would do.

Your information takes a much more human form. It makes more than sense. It makes an impression.

With FileMaker Plus, you can put information in any way you want, without arbitrary limitations. You design your output right on the screen, so you can see exactly what you (and your clients, staff, suppliers, publishers, board of directors) are

going to get.

To find out more about FileMaker Plus, come see us at Booth #1246. Directly across from Apple.

Award Maker Plus is a program for creating professional quality certificates with color or black & white borders. The detailed borders, specialized graphics, and personalized messages provide a keepsake ready for framing. Prints on ImageWriter printers and the LaserWriter. Package includes a special offer on French Parchment Paper to really set off each award.	1905
ASTRESEARCH, INC. 2121 Alton Ave. Irvine, CA 92714 Mac286 — MS-DOS Co-processor for the Macintosh II. Mac86 — MS-DOS Co-processor for the Macintosh SE. fAST Series — SCSI Disk Subsystems for the Macintosh Family. AST TurboScan — 300 dpi Scanner with image processing software for the Macintosh Family.	301				

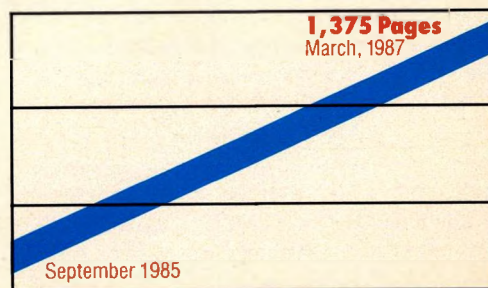

FROM 0 TO 1375 PAGES IN 19 MONTHS.

Smart marketers know how to pick a leader. And since its first issue appeared in Fall, 1985, **MacUser's** been the fastest-rising star in town. Our ad pages increased 142% in the 12 months alone...and our average number of ad pages per issue increased just as fast.

Advertisers know **MacUser** delivers the

sophisticated, active Macintosh buyers who keep sales zooming forward like a Maserati. Maybe that's why **MacUser's** ad pages keep racing ahead.

Don't let your competition leave you in the dust. Keep your sales on the right track by reaching 170,000 of the most knowledgeable, most interested Mac users you can target every month.

Bogas Productions 158
520 Cashew Court
San Ramon, CA 94583

Bogas Productions will be showing Studio Session™, a six voice music composition tool for the Macintosh. Studio Session™ was the winner of the MacUser Magazine award for "Best Music Program of 1986" and if you stop by the booth you will hear why! Studio Session™ uses digital sound samples (much like a CD player) to create very realistic music without any additional hardware for your Macintosh. This allows Studio Session™ to accurately produce jazz, rock and country music with real instruments (Saxophones, Electric Guitars and Fiddles). No other Macintosh music program can give you this flexibility. Also three additional music disks will be available Country Session™, Heavy Metal Session™, and Classical Piano Disk.

Boston Publishing Systems, Inc. 605
1260 Boylston St.
Boston, MA 02215

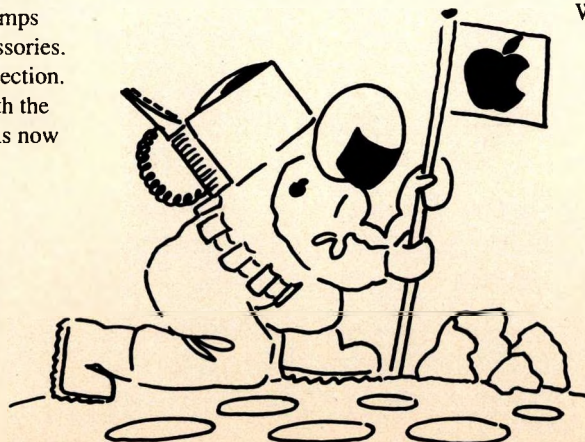

MacPublisher III, A desktop publishing software package for doing design, layout, and production of newsletter, brochures, catalogues, reports, manuals, data sheets, flyers, and ads will be featured by Boston Publishing Systems. With powerful features contained only in MacPublisher III, such as gray text in 10% increments, rotation of text and graphics, placement and resizing of PostScript items and color printing, desktop publishing users now have the power to create professional looking documents. Enjoy seeing real desktop publishing presentations and solutions with MacPublisher III at booth #605.

Bravo Technologies, Inc. 802
P.O. Box 10078
Berkeley, CA 94709-0078

Bravo will again be featuring MacCalc™, the fastest and easiest to use Macintosh spreadsheet. Only MacCalc offers a full choice of format, font, size, and style for each spreadsheet cell, making MacCalc the premier desktop publishing tool for creation of great-looking tables. MacCalc has won *MacUser's* Editor's Choice Award as The Best Spreadsheet, and has been lauded as "the spreadsheet of choice for users who want full functionality without undue complexity." (*MACazine*)

Broderbund Software 444
17 Paul Dr.
San Rafael, CA 94903

Broderbund presents for the Macintosh..Jam Session—A music performance program that lets even beginners perform professional sounding music, Calculus—A curriculum-based interactive program for learning calculus at home or in school, Physics—A complete introductory course in classical mechanics that covers over 300 problems, plus Ancient Art of War, Geometry and The Print Shop.

THE **SIGNS** OF REAL BUYERS... SHOW UP IN MACUSER

An astonishing 37% of all MacUser subscribers regularly use a hard disk with their Macs.

Nearly three in ten MacUser subscribers (27%) use laser printers.

A full 60% use database or data management software.

43% of MacUser subscribers regularly use a Mac Plus... and more than half plan to upgrade this year.

There's no point in wasting your media budget reaching people who won't turn into customers. That's why it's so important to use **MacUser** as your primary marketing tool.

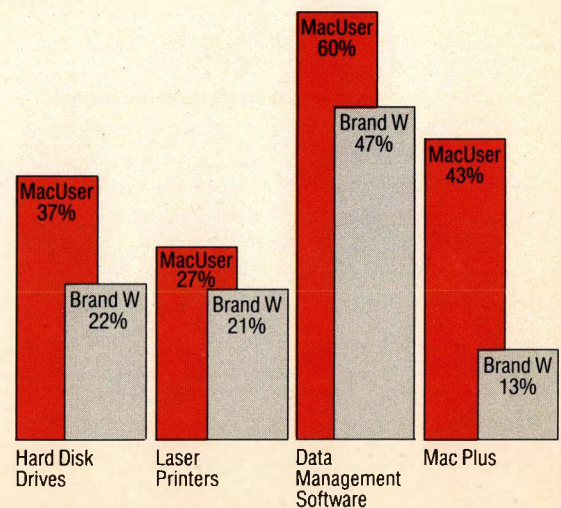

MacUser subscribers own and operate more sophisticated Macintoshes than readers of other Mac-specific magazines. Almost three in ten use their Macs as a source of income—so it's essential that they

understand the latest developments in the marketplace.

You owe it to your product to give it the best marketing edge you can. So tell 170,000 of the Macintosh market's most influential owners and users all about it...every month.

Centram Systems West, Inc.
2560 Ninth St. Ste. 220
Berkeley, CA 94710

The TOPS local area network enables the Macintosh, PC/MS Dos, and UNIX-based computers to directly share disks, files and peripherals in real time. TOPS networks can consist of a single operating system, or any combination of supported systems. For example, the TOPS cross-operating system translation allows a Macintosh user with MicroSoft Excel to open a Lotus 1-2-3 file located on a remote IBM PC, alter it, and store it back on the PC. TOPS also provides full security to protect against unauthorized access. TOPS PRINT allows PC users to print directly to a shared Apple Laserwriter. Centram's newest product TOPS REPEATER increases the size and length of AppleTalk networks, giving users greater flexibility in their network topology.

WHEN IT COMES TO USEFUL INFORMATION, MACUSER DOESN'T BELIEVE LESS IS MORE.

Knowledge is power. And **MacUser** delivers a powerhouse of knowledge to 170,000 serious Macintosh users every month.

We cram each issue full of hands-on reviews, inside-look news, and helpful tips and tutorials that readers can count on to be frank, unbiased, and of course, useful. **MacUser** gives Mac users the information they need... because artistic white space and stream-of-consciousness layouts just don't deliver the

powerful knowledge today's Mac user needs.

When we compared three issues of **MacUser** against the same three months' issues of "Brand W," we found that **MacUser** delivered more editorial features, columns, reviews and words.

Maybe that's why **MacUser** is the publication you hear about so often, at user groups and on Macintosh modem networks. The opinion leaders throughout the Mac community know

MacUser gives them more of what they read a computer magazine for.

We pack our pages with useful news. So we're packing in the readers who mean the most to you.

Computer Currents
20 Speen St.
Framingham, MA 01701

After four years as California's indispensable guide to computing, Computer Currents is now available in New England. Boston Computer News, which was published by IDG Communications, Inc., is now incorporated into Computer Currents. While retaining the best of the local editorial coverage of computing in the New England area that Boston Computer News has provided, Computer Currents adds many new features, such as product reviews, national news and analysis of industry trends by veteran observers such as Stewart Alsop and George Morrow. Computer Currents is an IDG Communications publication.

132 Computer Expressions
3833 Chestnut St.
Philadelphia, PA 19104

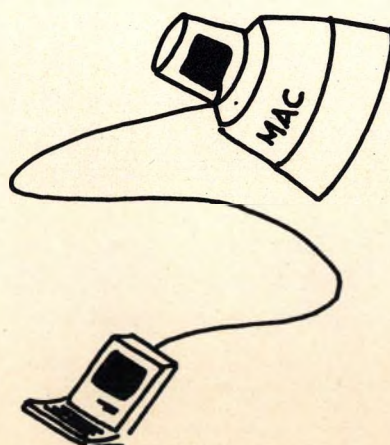

Computer Expressions, an advertising specialty manufacturer and imprinter, has doubled its product line available to the Macintosh owner. New items include imprinted Mouse Pads, Award/Picture Plaques, Golf Umbrellas, Canvas Bags, Seminar Folders and 3-Ring Binders. Other items are Coffee Mugs, Puzzles, Chocolate Cards, Sweatshirts and T-shirts. By working from disk and selling directly to companies and individuals, Computer Expressions offers the Mac customer superior resolution and substantial savings vs. other advertising specialty sources. Discounts are available on quantity orders. Non-Mac logos are also accepted. Computer Expressions counts Apple Computer, Inc., MACWORLD, Merrill Lynch and many Mac enthusiasts amongst its clientele.

Computer Friends, Inc.
14250 N.W. Science Park Dr.
Portland, OR 97229

Computer Friends will feature: SUPER-CHROMA — a turn-key, professional, color graphics system for the MAC 512K, the MAC Plus and the MAC SE — allows the user to color any Macintosh file using 256 simultaneous, on-screen colors and features full NTSC compatibility. MODERN ARTIST — a color paint program for the MAC II.

Computer Shoppe
615 Guilford-Jamestown Rd.
Greensboro, NC 27419

Turn your Macintosh into a CAD System! Speed, simplicity and flexibility are what MacPlots II™ is all about. MacPlots II supports numerous plotters, including the new HP DraftMasters. Is flexible enough to work with drafting and drawing software packages that save in PICT format or the Clipboard. You need only the Mac, supported plotter, graphic software and MacPlots II to increase productivity and decrease the time involved. Stop by for details, and for a new product announcement.

BIG... BIGGER... BIGGEST!

MacUser continues to live up to its reputation as The Hot Book in The Hot Market.

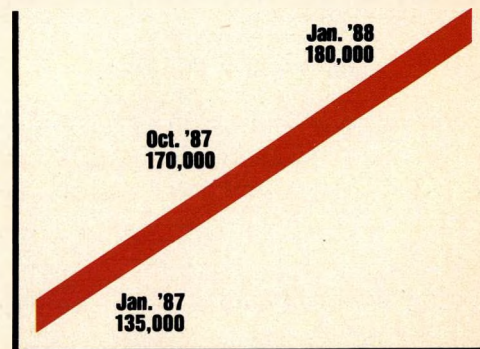

Our circulation shot up a phenomenal 35% when we went to 135,000 last January. Now we're continuing the pace—delivering 170,000 Macintosh decision-makers beginning October '87.

And, come January, we'll be expanding our rate base yet again...to 180,000.

That's the biggest paid circulation among Mac-specific publications!

We're bigger because we're better.

Readers count on us for the product information they need to make informed purchase decisions...and advertisers count on us to deliver the audience that has the biggest impact on product sales.

MacintoshToday

Where the News Travels,

Read the latest Mac market gossip? You probably have . . . because that's what the weekly publications have offered you. Until now.

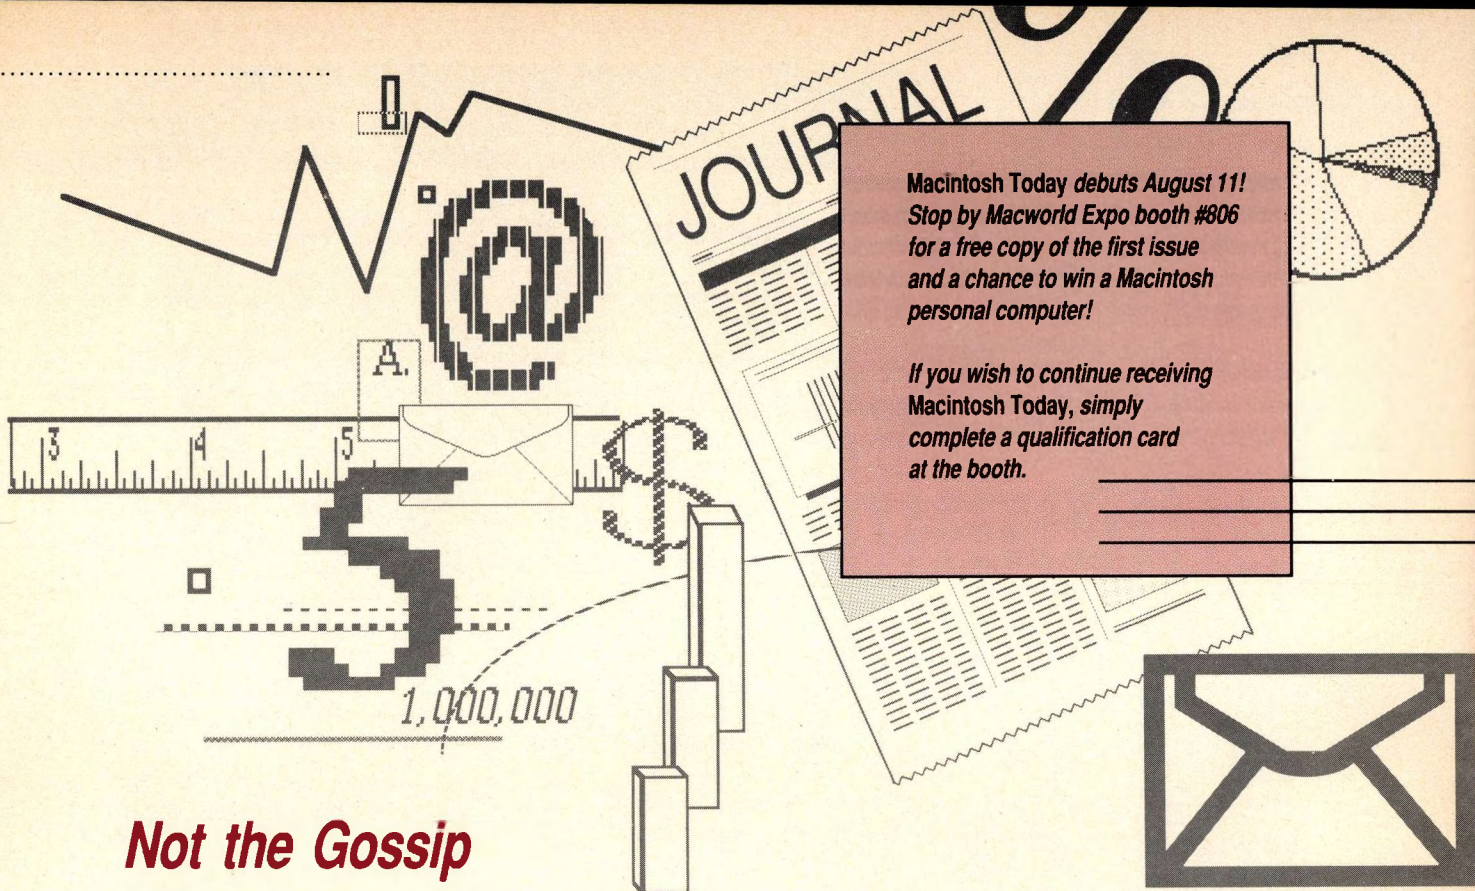

Macintosh Today doesn't print gossip. We print news. Information. Facts and figures. *Macintosh Today* is the reliable resource and product buying guide that today's sophisticated corporate Macintosh users need.

Our top priority is to provide timely and comprehensive coverage of new products, technological trends, and applications solutions. Offering perspective and analysis for management information systems personnel as well as micromanagers,

Macintosh Today keeps you up to speed in crucial areas of the Macintosh market and industry, such as:

- High news
- Product announcements and updates
- Communications
- Connectivity
- Desktop publishing
- Office automation
- Support and training
- Graphics

Rotating sections focus on education, government, CAD/CAM, and international concerns. Sections are followed by reviews, columns, features, op-ed pages, a resource guide, and quick user tips.

**Macintosh Today debuts August 11!

Not the Gossip

Macintosh Today is a fast and
easy read. We know how today's
corporate environment affects
your time. We're sensitive to your
needs to prioritize and strategize,
and this is reflected in the pub-
lication's design and structure.
You'll find it a well-organized,
"user-friendly" publication.

Macintosh Today – biweekly
through 1987, going weekly in
January 1988 – is published by PCW
Communications – a division of IDG
Communications, the world's
largest publisher of computer-
related newspapers and magazines.
Editor of such ground-breaking,
reliable information sources as
Macworld, *PC World*, and *Publish!*,
PCW Communications remains
dedicated to the personal computer
marketplace.

Macintosh Today – we'll give you
the facts, not feed you a line.

1604

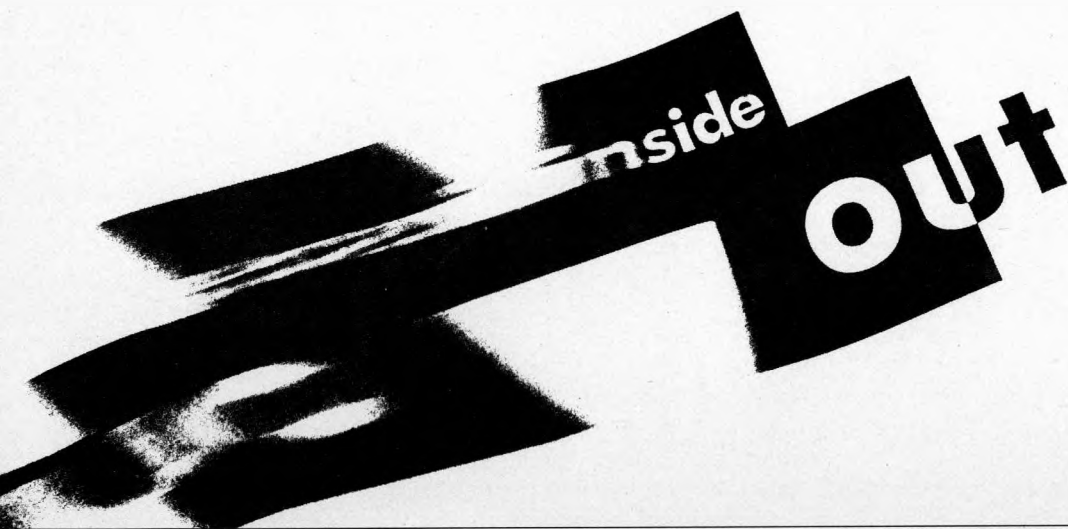

Inside Out, the first relational database engine for Macintosh™, reaches far beyond your highest expectations. Inside Out brings the power of a 4th generation database language to conventional Pascal or C development systems. Inside Out maintains every bit of information in a database in one Macintosh file. This file can grow as large as 256 gigabytes. Each database consists of up to 128 logical files. Three different types of logical files provide support for virtually any type of data, including variable length data. Database views allow applications to efficiently process related data, while guaranteeing data independence.

The multi-user version of Inside Out adds further to its impressive list of features, with improved record lockout to extend network efficiency. Of course, Inside Out is fast!

See us at MacWorld, Booth 1608.

Introducing Course Builder™

by Bill Appleton

COURSE BUILDER FEATURES

Stand-Alone Courseware

Five Kinds of Input

Complete Pixel Graphics Tools

Complete Object Graphics Tools

Powerful, Easy Animation

Performance Files

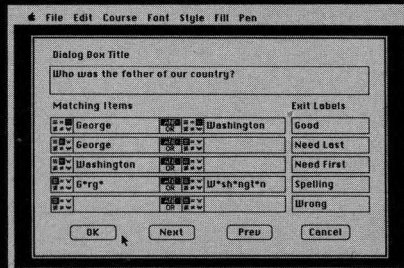

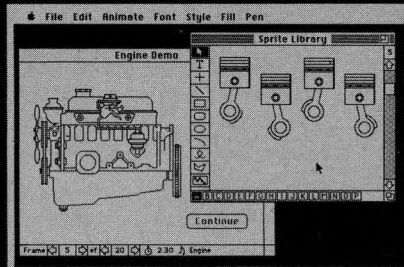

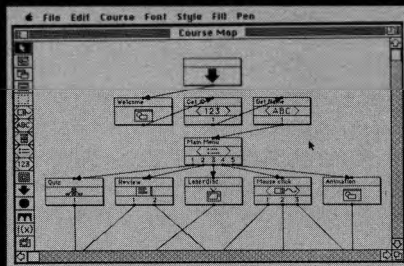

Music, Voice, Digital Sound

Intelligent Branching

User Variables

Free your imagination!

Course Builder™ is an innovative visual language that enables you to create stand-alone applications for *teaching, training and testing*. Programming is as easy as drawing a flowchart of your thoughts. Construct simulations, courseware, tests, training packages, guided tours, electronic textbooks and more!

Powerful built-in features

Convey your message with animation, text, graphics, speech and music. Receive input from dialogue boxes, menus, mouse clicks and controls. Combine these features with intelligent branching, user variables and performance files, and now you have everything you need to create state-of-the-art software.

Video Builder also available with laserdisc, VTR and slide projector interface.

Express yourself. Send for a brochure or send \$10 for an 800K demo disk. Available only from:

"Realizing the imaginable."

	Booth #		Booth #		Booth #
Kinetics, Inc. 2500 Camino Diablo, Ste. 110 Walnut Creek, CA 94596 Kinetics is demonstrating a family of Ethernet products for the Macintosh. EtherPort SE and EtherSC provide direct Ethernet connectivity for the Macintosh SE and for any Macintosh with a SCSI port, respectively. Using these products Ethernet can be used to replace AppleTalk cable for most Macintosh networking applications. The Macintoshes may also share the Ethernet and communicate with a wide variety of non-Apple computers. FastPath is an AppleTalk-to-Ethernet gateway, and allows a network of Macintoshes and LaserWriters to connect via Ethernet to other computers and to bridge to other AppleTalk networks.	627	Language Systems Corp. 1217 E Street S.E. Washington, DC 20003 Color Lab™ utilizes the full color capability of the Macintosh II to make a variety of color presentations. Color Lab provides a wide range of drawing, coloring and special effects tools to make your art work and presentations colorful, distinctive and unique. It works particularly well with film recorders for making color slides. We are also introducing our full-featured FORTRAN 77 compiler, the first of a series of programming languages and professional tools for Macintosh programmers from Language Systems.	949	will analyze and interpret your financial results. It won the Macworld first annual World Class award for best accounting package. Insight includes Accounts Receivable and Billing, General Ledger and Accounts Payable. Notes provides on-line help and templates for users of Excel, PageMaker, Jazz, Works and Word. Front Desk is a time-management system, and useful for professionals and service organizations that need to schedule or track multiple people, facilities, or equipment.	
KMW Systems Corp. 100 Shepherd Mountain Plaza Austin, TX 78730-5014 KMW SYSTEMS is exhibiting the Series II (multiport) and Series III (single port) Twinax Protocol Converter. Twinax links an Apple Macintosh to an IBM System 34/36/38 allowing both printer and interactive terminal emulation, as well as file transfer. Additionally, the Series III now offers IBM 5219 printer emulation to support the Hewlett-Packard LaserJet series.	714	Laser Designs Corp. 1430 Mass. Ave. Cambridge, MA 02138 Desktop Publishing — Hardware, Software, and Training. Laser Designs Corp. specializes in equipping and training large firms for in-house desktop publishing. We can purchase equipment for you at prices well below any computer store or mail order house. Let us use our extensive experience in the field to recommend the optimal desktop publishing system for your needs. Our training and follow-up services will ensure that your production department is running efficiently and effectively. SEE US AT BOOTH 1908. Please see our advertisement on page 94	1908	Letraset USA 40 Eisenhower Dr. Paramus, NJ 07653 Ready,Set,Go!4.0 by Letraset is the newest version of the popular page design program that combines powerful grid-based layout features with advanced word processing capabilities. New features include arbitrary runaround, page sizes up to 99 x 99 inches, style sheets, visual tab ruler, new interface with grabber hand and diagonal line drawing tool, spelling dictionary increased to 100,000 words with suggest correction spelling feature, and many more. Letraset will also introduce image enhancement software-code named The Realist — that offers the ability to creatively manipulate the gray level information of high resolution scanned images. Please see our advertisement on pages 18 and 19	101
Kroy, Inc. (Sign Systems Div.) 7560 E. Redfield Rd. DEFORMED.

Forms deformed? If producing a presentable form has always been a formidable task, you'll appreciate the scene on the far right. It's TrueForm™—the first and only Macintosh™-based system that lets you deftly deal with any form you feed it.

TrueForm is not just another forms software package, although it does offer you a choice of 20 ready-made forms to use. And it's not just a design-your-own-forms program, yet it lets you do that, too.

If you fill out lots of forms, lots of different kinds of forms or forms supplied by other people, TrueForm will transform your working world.

Feed any form into TrueForm's Image Scanner, and it's transmitted to your screen. Complete with logo and graphics. In seconds.

The Power of Color.

Until now desktop publishers could only dream of it.

Great minds create powerful ideas in color: Their thoughts may be blue sky, wave a red flag or make the competition green with envy. But, somehow the reports and graphics that spring from these color ideas rarely convey the life and energy of the original thoughts.

Kroy® brings the power of color to desktop publishing and business communications with a simple process compatible with virtually every laser printer, including the Apple™ LaserWriter, and most photocopiers that apply dry toner to the page.

Presentation graphics like these are created on a laser printer, then enhanced for visual impact with KroyKolor.

To bring your idea to life, add Kroy-Kolor™ to the message. There are 60 vivid colors and shimmering metallic foils to match the mood and add impact to your business communications.

The matte and gloss colors range from a cool blue, to a blazing, fire-engine red.

Especially exciting are the 14 metallic

foils that perfectly simulate foil stamping on your logos, invitations, letterhead, presentation folders, newsletter, artwork and mock-ups. The dazzling metallics range from polished gold and silver to burnished aluminum and copper.

Signs and display graphics of all types can be created on a printer or copier, enhanced with KroyKolor, then laminated with clear plastic or mounted into a Kroy sign frame.

Applying KroyKolor is an easy (and amazing) process.

After your original has been printed on a laser printer or photocopier, you insert it into a sheet of KroyKolor transfer film, feed it through the processor, peel away the transfer film and you have vibrant color in seconds.

The real fun begins when you create multi-color business graphics (such as a pie chart with each slice a different color). To do this, cut pieces from various colors of transfer film and place the pieces onto the areas of the graphic you wish to highlight. That's how the multi-colored examples shown in this ad were produced. It's possible to produce multi-colored presentation graphics in a few minutes which would have taken

several days (and several hundred dollars) to produce at a print shop.

Kroy, a leader in graphics technology for 27 years, also provides quality papers to make your color presentations look even better.

Fulfill your dream of desktop publishing in color today for just \$995, the suggested retail price of the KroyKolor processor.

KroyKolor film is available in boxes of 10 or 100 sheets and is priced at about 50¢ per sheet.

For information or to place an order call toll free:

800-521-4997

In Arizona 602-951-1593
Weekdays 8am-5pm MST

The KroyKolor processor accepts materials up to 12" wide. KroyKolor transfer films are slightly larger than an 8½x11" page, providing edge-to-edge coverage.

50% MORE STORAGE. IMAGINE WHAT IT'LL DO FOR THE MAC SE.

Get 30 or 45 meg storage with our internal drive upgrade.

Until now, there were only 2 ways to buy the new Mac SE™. You could get it equipped with two 800K floppies. Or, with a floppy and a 20 meg internal drive. Those were your choices.

We thought that was a little limiting. What about all the storage hungry people out there? People who want

to outrun, outsmart and outdo the competition? Well, here's your answer.

INTRODUCING INTERNAL HARD DRIVES FOR THE MAC SE. THE 30 SE AND 45 SE.

Before you buy your Mac SE, have your dealer replace one of its standard 800K drives with our 30 meg drive (300 SE). That gives you 50% more storage. 50% more, that's nothing to sneer at. And all it will cost you is \$100 over the regular 20 meg SE price.* Or if you want more storage, have our 45 meg drive (450 SE) installed.

Our drives come with shock absorbing mounts to manage the hustle and bustle of everyday use. And if you need to chain hard drives or tape drives, you can easily turn termination on or off. Plus, changing SCSI address is as easy as a push of a button. (Apple doesn't offer any of these features.)

So if you're after the most storage a little money can buy, talk to a Mirror Tech dealer. And together, we'll make your Mac SE the best it can be.

FREE SOFTWARE. ANOTHER GREAT REASON TO UPGRADE.

If you choose to upgrade your Mac SE with our 30 or 45 meg drive, we'll give you THINK Technologies LaserSpeed™ (a \$99 value) free.

Plus we'll throw in QuickPrint™ (a \$79 value) and SafetyNet Personal backup software (a \$150 value) too.

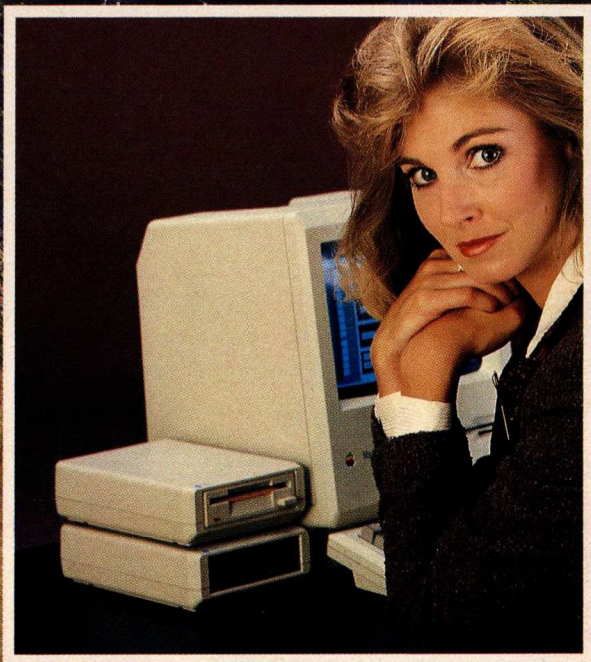

Of course, both of these drives are covered by our full-year warranty. So give your Apple dealer a call right away. Because when a deal's this good, the phone lines get busy real fast.

MIRROR TECHNOLOGIES Inc.

2209 Phelps Road, Hugo, Minnesota 55038 (612) 426-3276
Canada Distributor, Peripherals Plus Inc. (514) 849-5685

Macintosh SE is a trademark of Apple Computers, Inc. LaserSpeed is a trademark of THINK Technologies. *With rebate on 800K floppy.

Power and Elegance

Wyoming's elegant — and very powerful — Elk in beautiful Teton country. (Photo courtesy Wyoming Travel Commission.)

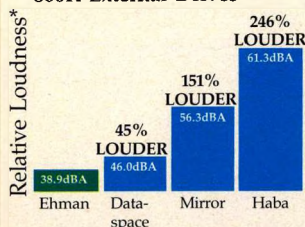

Finally, disk drives that offer the advanced power and elegant design at the price you've been waiting for.

800K Disk Drive

- *Extremely Quiet*
- LED (so you know the silent drive is running!)

- Manual eject button
- Compatible with old and new Mac ROMs — use on standard 512K
- Compact case matches Mac aesthetics
- 12 month warranty (four times Apples!)

Comparison of 800K External Drives

*Absolute readings — related on a logarithmic basis. Independent tests conducted by Univ. of Utah, Mechanical Engineering Dept.

20MB and 40MB SCSI Hard Disk Drives

- Smallest drives available — completely portable
- Head-locking safety feature, rated 60 Gs
- Mean failure time of 25000 hrs.
- SCSI port available for 512K Macs
- 12 month warranty

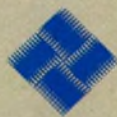

Ehman 800 double-sided external drive and Ehman 20HD 20MB SCSI hard drive. *State-of-the-art design and performance. Completely silent, completely portable. With 12 month warranty.*

Ehman Engineering — The Dependable People

Like hundreds of companies have for years, you can depend on Ehman Engineering for the finest Macintosh peripherals at unbeatable prices. (Ask about our top-quality memory upgrades and 512K SCSI port for the Mac.) We take pride in our work, which is why all Ehman products are elegantly designed inside and out, and come with a 12-month warranty. And we take care of our customers, which is why you'll always find a friendly, knowledgeable person on the other end of our 800 number.

Call us today for details on the complete Ehman product line. We're looking forward to talking with you.

Mergenthaler Linotype 200 Unicorn Park Dr. Woburn, MA 01801	635	Micro Dynamics, Ltd. 8555 16th St. Ste. 802 Silver Spring, MD 20910	1556	MicroGraphic Images Corp. 20954 Osborne St. Canoga Park, CA 91304	320
Linotype will be displaying their Linotronic 300, Laser-based Imaging System in a postscript configuration. The Linotronic 300 is capable of outputting text and graphics at resolution of 635 — 1275 — and, 2540 dots per inch. Additionally, an updated postscript RIP will be shown with faster processing speeds and greater storage of fonts on line.		Micro Dynamics MARS (Multi-user Archival and Retrieval System) is an integrated electronic document management system that allows a network of users to permanently store and quickly retrieve vast quantities of scanned paper and/or computer-generated documents using Macintosh computers, digital scanners, and WORM (write-once, read-many) optical disks. This cost-effective system features a modular software design incorporating state-of-the-art technologies, fast retrieval, security, and easy customization.		MegaScreen Video Systems are a large-screen enhancement designed to increase the available workspace display on Macintosh 526%. Compatible with standard Macintosh software, the system is available for Macintosh Plus, 512k Enhanced and SE versions. All video parameters are fully user-definable through software. Included with the system is MegaTalk Electronic dual-screen mail software and MegaZoom, a utility program which produces a magnified image of the Macintosh screen on the 19.5" MegaScreen. System resolution is 1024 x 900 (maximum), and is available with many options.	
Meta Software Corp. 150 CambridgePark Dr. Cambridge, MA 02140	946	Micro Planning International 235 Montgomery St. Ste. 840 San Francisco, CA 94104	846	Microsoft Corp. 16011 N.E. 36th Way Redmond, WA 98073-9717	207
Introducing <i>Design 2.0</i> , the powerful graphics and text handling program for visualizing complex systems that run on the Mac II, in color, and on standard Macs. Features: multi-level diagrams, powerful editing capabilities, hypertext, connectors automatically redrawn, PICT format output, up to 10,000 page documents, new documentation. Applications: flowcharts, system design, communication networks, presentation graphics, brainstorming. Meta Software also offers Design + DA Development System and Design Open Architecture Development System, program-mable systems for developing final applications.		MICRO PLANNER Plus, one of 1986's "50 Best Software Products for the Macintosh", is a powerful yet easy-to-use, productivity package designed to help you achieve objectives on time and in budget. The program is friendly, intelligent and quick to appreciate potential problems; even the most complex project is presented in understandable 'visual' models so resources are controlled and progress monitored. PROJECT EXCHANGE, a new extension allowing projects to be planned in coordination with other packages — not simply spreadsheets, databases but also mini/mainframe systems — provides a level of accuracy and control never available before. Take responsibility for your projects with MICRO PLANNER Plus and PROJECT EXCHANGE — an unbeatable combination.		Microsoft, the top-selling developer of business software for Macintosh, will be demonstrating the following products. You'll see the latest version of Microsoft Word 3.01, Microsoft Works 1.1 and Microsoft Excel 1.04-working together in an office scenario on an AppleShare network. These products now feature AppleShare support, Macintosh II compatibility and removal of copy protection. Other products featured will include Microsoft File, Chart, Multiplan, BASIC Interpreter, BASIC Compiler, FORTRAN and the ever-popular Flight Simulator.	
Micah Storage Systems, Inc. 56 Worral Dr. Newark, DE 19711	447	Microfinancial Corp. 15404 E. Valley Blvd. Industry, CA 91746	637		
Micah Storage Systems continues to bring Micah to the front of the Macintosh video and storage arena. Micah's all American component drives (20,30,45,90 meg) are compatible with all Macs from the 512E through the Mac II. So whether its an internal AT or external XT drive you need for your Mac, Micah has the highest quality drive for you. The Micah Vision video system for the Mac SE and II are the first available to offer you double tabloid size at 72 DPI and WYSIWYG. So look to the future with Micah's advanced technology, today!		Flexware is a complete line of multi-user applications for the Macintosh including Receivables, Payables, General Ledger, Inventory, Job Cost, Payroll, Purchasing, and Order Processing plus a wide variety of software for specific markets. Flexware has been refined for more than a decade. It is specifically designed for the serious software needs of more successful companies. It is available for IBM, VAX and other computers which can be connected together in the same network.			

Booth #917 is Beyond "4th Dimension"

4th Dimension® is a trademark of Acius, Corp.

A Power-User introduces ...

"Automated", multi-user, programmable, power-base.

Current database products are too difficult to set up, hard to use, inflexible, and not productive enough to justify the time and associated costs... even 4th Dimension. Power-user developed 1stTEAM offers the unique, significant advantage of "automatically" producing small "work files" in the "read-only" mode from a large master file. Each sub-file then becomes the "personal" file to be worked on, updated, transmitted, or printed. The master file allows only one "administrator" access, while unlimited others can retrieve specific records through a relational "JOIN" command. 1stTEAM can "remember" all your Reports, Macro-Queries, Produce-A-Datafile, Append, Update, etc. in the form of Icons that can be launched as a group from the Finder! Since they are Icons, they can be moved, or modified just like any other file. This feature permits print files of reports, invoices, labels, etc., to be produced at off-hours along with automatic file updating and preparation of the new days "work files". **It's simple to use!**

and ... Custom Vertical Market Interfaces:

1stDESK recognizes that many businesses, consultants and VARS are "bottom-line", or marketing oriented and are not interested in "programing" even at the lowest level of our products. 1stDESK has created the "VMI" (Vertical Market Interface) which allows 1stDESK programmers access to code that can efficiently produce custom screens, graphics, reports, charts, hardware interfaces, etc. written in "real" programming language. The solutions 1stDESK can provide using VMIs are not available through the "user-interfaces" of even the most sophisticated databases. A VMI is not a "Template", it is a custom vertical market interface. 1stDESK does not supply "turn-key" integrated systems, such as the "does-everthing" accounting package, this is the job for you, the consultant, or VAR.

and how about these for application ideas...

Sales, Marketing, Telemarketing: Since cost effectiveness is a factor, and the myriads of inquiries have to be quickly and efficiently analyzed to qualify potentials, aVMI could be designed to download files from other computer sources, merge lists, auto-dial phone numbers from this merged list, provide a "Query" screen with "prompts", a daily activity analysis, custom letters, and compare leads and lead source to sales.

Dealer/Distributor Referrals: 1stDESK could provide an on-screen "map" which your operator could simply click on the approximate "area" in question, the dealer data would appear in a window, enter the inquiry send literature, and modem the leads for follow-up, integrated into a single package!

Personel Agency: Many businesses require "matching". Use a VMI-Match to provide viewing the person and company files simultaneously. Clicking each field would present an "IF" box to select qualification range, once you have selected as many fields as desired you just click again to see a report of ranked potential matches.

Handicap Telecommunications: The Macintosh user interface is exploited to the limit of simplicity in 1stGATE allowing almost "click" only remote database access. 1stGATE/1stPORT could be automatically interfaced to a remote mainframe database with total 1stGATE/Macintosh interfaces. The new keyboard- bus introduced on the Mac-SE and Mac II could accomodate special input devices to aid the handicapped.

Auto Parts Store: 1stDESK and Macintosh combined power potential becomes incredible here. Type in the make and model of the car, "Click" on a graphic view of the car, it "explodes" into the main components, click the engine graphic and you see the components, click the component and you will see the inventory and pricing!

Medical Professional: A VMI could provide a ready to use package for patients to register for their visit in the office, diagnosis, diagnostic results, drug recommendations, automatic billing, and reminders of appointments.

***** THE PERFECT VAR/VAF PLATFORM *****

1stDESK Systems, Inc. 7 Industrial Park Rd., Medway, Ma. 02053 1-800-522-2286/(617)-533-2203

Booth #917 is Beyond Belief !!!

Create a database from MacPaint® ... sorry FileMaker®, now you could be the orphan!

Draw, or "digitize" almost any "paper" form design and 1stSCANs' "Smart-Scan" feature reads the PIC file creating the fields based on "hollow blanks" and disconnected lines. 1stSCAN opens an exact reflection of your printed form as a database entry screen, ready to format, but without the confusion of creating and moving of those "little squares".

Bulletin Board with Remote Database ... sorry Red Ryder, it's very simple to use.

1stDESK has an exiting new Bulletin Board with database capability! To dial out and log on simply "click" the mouse ... the unattended remote Mac answers, you get a standard Macintosh "drive/file" selection box. Now you can leave messages, browse, transfer files to and from folders, volumes, and Macs just like it was your own local drive or network. More amazing is the "transparent" user interface if you get if you select to use the 1stGATE database option, it looks just like our 1stFILE program! Remotely you can edit, add, delete and even search records remotely!

Merge any data into MacWrite®/WORD® ... sorry MicroSoft®, it's far easier than your "merge".

1stMERGE is a stand-alone list manager that produces and uses 1stDESK files, but output directly using your word - processing program with three mouse "clicks". You create a form letter in MacWrite/MS-WORD using "[]" to define the data insertion points. 1stMERGE allows using the same field any number of times. The data can be from any 1stDESK file, converted from any data source, any modem file, any Macintosh or other computer database. You can even use the data from 1stFILE created from MACROS to select the wording to make each different based on the individual case. 1stMERGE features a selection of page range, IF, and multiple labels.

New Era In Data Management Systems Keep it SIMPLE, make it POWERFUL, and offer ...

**30 Day Money-Back-Guarantee,
Sell Manuals Without Software,
Custom Interfaces For Users/VARs,
provide Free* Demos Too!**

**Why hasn't anyone else done that?
They aren't users ... that's why!**

*Available free at your Apple Dealer if you bring 800k.

MicroStore, Inc. Rte. 3, Box 168 St. Peter, MN 56082 MicroStore manufactures the highest quality portable 3.5" disk storage units available (see MacWorld, April edition, review of Disk Carriers). The DiskBook product line is a portfolio design with 3 models to choose from: DiskBook — 32 holds 32 disks; DiskBook-Plus holds 16 disks, notebooks pads and pens; and the DiskBook-10 holds 10 disks. The compact slimline Traveller series, with a design similar to billfolds, is also offered in 3 models: Traveller-12 which holds 12 disks; Traveller-8 holds 8 disks, and the Traveller-4 holding 4 disks. DiskBooks and Travellers are available in the popular colors of navy, red, gray and burgundy. MicroStore newest product the Fast-Pad mouse pad, which is designed for the Teflon bottomed mouse as found on the Mac II and SE, comes bundled with Tef-Glides-teflon surfaced mouse feet for the Mac Plus & 512. The Fast-Pad's special textured surface provides for low friction and consistently accurate mouse tracking—you can easily grab and move objects by the pixel with no annoying skips. Fast-Pad's durable laminated surface is easily wiped clean, resists soiling and will last years. Fast-Pads are offered in gray, blue, Mac platinum or beige, and limited edition tahitian floral prints.	1222	Microtek Lab., Inc. 16901 S. Western Ave. Gardena, CA 90247 Microtek Lab., Inc. is the leading manufacturer of desktop image and text scanners. Microtek's family of sheetfeed and flatbed scanners offers the finest image processing capabilities available. Microtek also features a diverse line of related products such as Intelligent Facsimile Boards and CAD/CAM conversion software. Our product line includes two 300 dpi intelligent sheet-feed scanners, the MS-300A and MS-300C, with superb image processing capabilities. For flatbed needs, the MSF-300C offers the same superior 300 dpi features. All operate in both the IBM-PC and Macintosh environments. The MFAX96 Intelligent Facsimile Board gives facsimile capabilities to users of PCs and Microtek scanners. To round out the Microtek family, CADmate raster to vector conversion software can be used to interface the scanners to CAD/CAM systems.	500	Miles Computing, Inc. 7741 Alabama Ave., #2 Canoga Park, CA 91304 Miles Computing is pleased to announce 3 new products. Harrier Strike Mission II is the long-awaited update: complete with new scenarios, faster action, and more control. Trici Venola is back with 2 full disks of astonishing graphics in Mac the Knife 5: People, Places & Things. And don't miss The Fool's Errand, a fantasy puzzle by Cliff Johnson—a game like no other. Three disks of unbelievable play. You've never seen anything quite like it.	618

INFINITE CAPACITY...

And We Start You Off With 100 MB Free.*

Peripheral Land introduces the Infinity Drive, a SCSI 10 megabyte removable disk system which combines hard disk-like performance with the convenience and economy of floppy disks.

What the *Infinity™* drive does for you:

- **Provides you with unlimited capacity.**
If you run out of room on your current disk, simply insert another.
- **Use as your primary storage disk or as a back-up unit.**
- **Compatible with the MacPlus, Mac SE & the Mac II.**
- **Complete data security.**
Since the media is removable, it can be taken with you or locked away.
- **Fast 75 millisecond access time.**
The *Infinity™* drive uses an advanced voice coil servo actuator to give you fast data access.
- **Read IBM AT 1.2 megabyte and 360k XT floppies.**
The *Infinity™* drive gives you a gateway between Macintosh and IBM files in a single disk unit.
- **Reliability backed with a one year warranty.**
The *Infinity™* drive is built to last and is backed by a full one year warranty covering parts and labor.
- **Affordable media: \$18 per 10 megabytes!**
Expand as much as you want: 100 megabytes of storage for only \$180!
- **Peripheral Land's advanced software utilities.**
Each drive comes with partitioning, HFS/MFS support, DA volume mounter, file locator, and a backup utility with file, folder, volume and incremental capabilities.

***Special Introductory Offer:** Peripheral Land will include the 100 megabyte pack (ten 10 megabyte floppy disks) **FREE** if you purchase an *Infinity™* drive before September 30, 1987.

Don't be bound by standard hard disk capacities. Grow with Peripheral Land's *Infinity™* drive.

Suggested retail: \$1,095.00 *Infinity™* (Introductory price until September 30, 1987.)

\$1,095.00 *Infinity™ II* (Hard shell media version, non-IBM compatible.
Media cost \$59.00 per 10 megabyte cartridge.)

Macintosh SE, MacPlus and Mac II are trademarks of Apple Computer Inc. *Infinity™* is a trademark of Peripheral Land Inc.

Peripheral Land

47800 Westinghouse Dr.
Fremont, CA 94538

Peripheral Land Incorporated introduces a new line of high-capacity 10 MB SCSI floppy disk drives for Apple's Macintosh computers. The drives, called *Infinity* and *Infinity II*, combine hard disk-like capacity and performance with the convenience of floppy diskettes. Advanced voice coil head actuators result in an average access time of 75 ms for the *Infinity* and 65 ms for the *Infinity II*. The *Infinity* drive provides a gateway to IBM by giving the user the ability to read MS — DOS files from AT 1.2 MB and XT 360K byte floppy diskettes. Peripheral Land is also introducing the PL40i and the PL60i, a new line of hard disk drives for the Macintosh SE. These drives add power to the Mac SE while maintaining portability. Owners of the Macintosh SE two floppy drive system will benefit from the new Internal drives. An external enclosure is provided to house the second floppy drive. The owner gains both an internal hard disk and external floppy drive. Both the *Infinity* and the Internal drive ship with software utilities for partitioning the drives, backup software, DA volume mounter, and a file locator DA. The drives are covered by a one year limited warranty.

Personal Bibliographic Software, Inc.

818

412 Longshore Dr.
Ann Arbor, MI 48106

Personal Bibliographic Software, Inc. announces Pro-Cite, an upgraded version to the Professional Bibliographic System, the most advanced bibliographic database and text management system ever designed for the Macintosh. With Pro-Cite you can store, sort, search, index, and format your references according to any bibliographic style you need. And, with the Biblio-Link companion programs to Pro-Cite you can transfer records downloaded from online database systems (BRS, DIALOG, MEDLARS) directly into a Pro-Cite database.

Ten thousand pages, take it or leave it.

For those of you going places, here's a little something that solves big storage problems in the time it takes to say "who has the Farnsworth financial files?"

Introducing Totem.™

A rather revolutionary Bering 20 mb Bernoulli compact disk drive system for Macintosh computers. And, the first truly *portable* 5¼" system. One that lets you tote around 10,000 pages of data on a sleek cartridge about the size of a piece of bread.

Translated, that's 25 times the storage you get on one standard floppy.

Yet unlike floppies, the Totem is no slouch for speed. It's just as fast as a hard disk. In fact, your computer will think it's a hard disk. You can even share it with co-workers. And its advanced Bernoulli aerodynamics make it resist head crashing. If you've ever used hard disks, you know what a pain that can be.

But the real beauty of Totem is that it fits perfectly right under your Mac. No mess. No fuss. And no extra hardware to buy. To add storage, just pick up another Totem cartridge.

Last, but certainly not least, there's a whole family of Totem drives to choose from. They're all in the brochure. To get yours, write or call Bering Industries, Inc., 280 Technology Circle, Scotts Valley, CA 95066. Inside California, call 800 533-DISK. Call 800 BERING 1 outside California. Just say "I'll take it."

For Your Convenience

Why do more work than you have to? Microsoft® *Works* gave you word processing, spreadsheets, and a data base. But don't you still wish you had an "automatic time-saving device" to take care of the everyday, repetitious typing?

Get the WorksPlus Commands program. With its pre-programmed commands, you can eliminate much of your repetitive typing. With the touch of a single Macintosh™ command key, you can

- Select a style rule
- Set up multi-column labels from a data base
- Generate a table of contents or an index
- Log on to a time-sharing service

and much more.

Once you see how easy it is to use, you can also use WorksPlus Commands to create your own commands. You don't need to be a programmer. Simply record the keystrokes or mouse clicks and you have an "instant" command.

Of course, if you have a programming inclination, WorksPlus Commands provides a full programming language for your

convenience. Create your own complex macros to do your bidding at the touch of a key.

Put your time to your advantage instead of striking the same keys over

... and over

RecordHolderPlus — A new version of the popular and easy-to-use Record Holder data manager. RecordHolderPlus adds graphics and color capabilities, new data fields (Radio Buttons, Checkboxes, Table Lookups, etc.), data entry assistance and much more. Perfect for mailing labels. **MergeWrite** — At last, mail merge for MacWrite. Create personalized-looking form letters, using MergeWrite by itself or with any compatible data manager. If-then-else logic lets you direct different paragraphs to different recipients. Perfect mail manager when used with RecordHolderPlus.

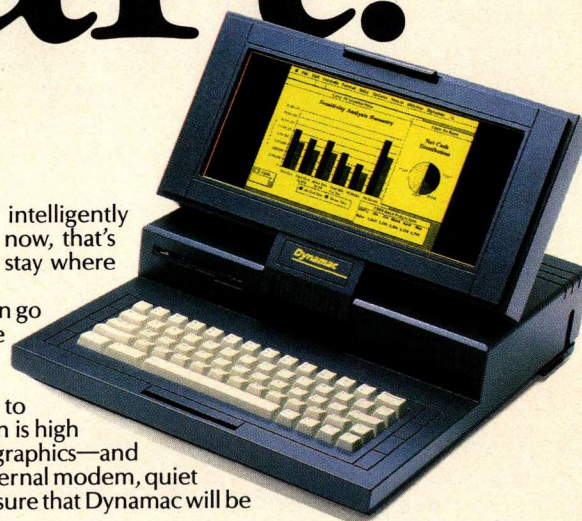

Smart.

Introducing DYNAMAC. Because the world of information doesn't sit still.

Your Macintosh™ Computer has moved you easily and intelligently through a full spectrum of desktop solutions. But, until now, that's where the movement stopped. Desktop solutions had to stay where your Macintosh did—on your desk.

With the introduction of Dynamac, however, solutions can go wherever problems or opportunities are. Not just because of the Dynamac's small, sleek physical dimensions but because of its very big performance dimensions.

Up to 40 megabytes of hard disk storage and up to 4 megabytes of main memory are built in. Dynamac's screen is high resolution gold Electro-luminescent—equal to the finest graphics—and displays 46% more information than the Macintosh. The internal modem, quiet fan, high-grade surge protector and many other features ensure that Dynamac will be an office-quality resource wherever it goes to work.

Moves.

Where Macintosh leaves off, Dynamac is picked up... packed with features and packaged in a sleek black case. It goes easily across town or across the country; it comes home with you as naturally as your briefcase.

Dynamac is a hardy traveler, but also one with savoir faire. The internal 300/1200 Baud modem operates on both U.S. and CCITT international standards; compatibility at 110/220 volts, 50/60 Hz is built in... as is an E-Machine interface for a direct connection to the Big Picture™ monitor.

Dynamac is available in more than two dozen different configurations—with prices starting at just under \$5,000. All options and upgrades come from a single point of warranty.

Dynamac. It lets you leave the office without getting left behind.

For additional information, please contact Dynamac Computer Products, Inc.,
1536 Cole Boulevard, Suite 252, Golden, CO 80401. (303) 233-0305.

Looking for Something New?

We
know,

you've heard it all before. Every computer game is "something new." We've been publishing Macintosh software since the beginning, and believe us, we've heard it all before too. So when Cliff Johnson gave us a call and said he'd written a game that was "really something new," we thought "yeah, sure."

Well, **the fool's errand™** really is something new. It's a fantasy puzzle, full of enchanting, and enchanted, scenes: It's got hands-on visual puzzles that spark your imagination, mind-boggling brain teasers and curious wordplay; a cryptic story that ties the thread that binds; light-hearted tricks to catch you by surprise; and the Fool, whom, in his search for wisdom, must rebuild the Sun's Map to regain that which has been lost. Each task, from the simple to the challenging, can be explored at will: stopped, continued, restarted.

But we really don't expect you to believe all this yet. Ask around. See your dealer. Try it.

Software Power Co. P.O. Box 14133 Fremont, CA 94539	154	Spectrum HoloByte 1070 Marina Village Pkwy. #203 Alameda, CA 94501	1552	Strawberry Tree Computers, Inc. 1010 W. Fremont Ave. Sunnyvale, CA 94087	446
PowerDisk is a program that significantly increases the speed of a Macintosh by caching disk data in memory, thus eliminating much I/O. PowerDisk includes a DA for controlling its cache and displaying memory usage; a unique dynamic cache, which automatically sizes itself to an application; and a "Delay Writes" feature to speed up saves. PowerDisk is guaranteed to dramatically improve the performance of any disk drive used with the Macintosh. PowerDisk is not copy protected and sells for only \$59.95.		Spectrum HoloByte will be showing the two latest additions to their simulation product line. Falcon is the F-16 fighter simulation that puts the user in the cockpit to perform fighter maneuvers while engaging enemy MiG's in dogfight battles. Sound and digitized airplane images lend to realism and playability of Falcon. Another new product PT-109, the torpedo boat simulation, takes you to battle on the seas. Enemy attacks will come not only by sea, but from the air as well, so the user must be prepared to make most effective use of his arsenal of weapons consisting of torpedoes, depth charges, rockets, and machine guns. GATO, ORBITER, and TellStar, are other products being displayed.		Strawberry Tree® announces new products for the Macintosh. The Analog Connection SE™ for the Macintosh SE and the Analog Connection M2™ for the Macintosh II are high performance data acquisition boards available in both 12-bit resolution for laboratory or factory applications, and 16-bit resolution for high precision laboratory applications such as chromatography. They are designed for measurement and control of DC voltages, thermocouples, RTDs, strain gages, pressure sensors and many other analog signals.	
Solutions Int'l. Box 989, 29 Main St. Montpelier, VT 05602	544	Springboard Software 7808 Creekridge Circle Minneapolis, MN 55435	401	SuperMac Technology 295 N. Bernardo Ave. Mountain View, CA 94043	1434
SuperGlue™ — software that allows the user to transfer graphics as large as a full page between most Mac programs. With SuperGlue, you can send your work electronically without the recipient having to own the program that made the graphic. SmartScrap & The Clipper™ — a pair of desk accessories. SmartScrap is a better scrapbook that has a pictorial table of contents. The Clipper is used to scale and trim graphics proportionally.		NEW! Springboard Publisher™ is an integrated desktop publishing program that offers page layout, word processing and graphics creation — all in one program. Springboard Publisher is designed for people in home, school and business environments, enabling them to create professional looking pages quickly and easily. Springboard Publisher offers total page layout control, allowing users to change their design as easily as they change their minds. Text and graphics can be placed anywhere on the page. (Current) Springboard Software will also demonstrate Certificate Maker™, Early Games for Young Children™ and Easy as ABC™. Certificate Maker allows users to reward family, employees and friends while Easy as ABC and Early Games provide challenging and creative learning games for children.		SuperMac Technology continues its innovation with exciting new hardware and software for the Macintosh family. Come by our booth and see! Now shipping: Spectrum and SuperView high resolution graphics boards and monitors for the Mac II and SE; DataFrame 40 XP and 20 XP, our 20 and 40 SCSI Hard Disks. We also feature high quality memory enhancements: SuperRam 2 and 4 megabyte upgrades for the Mac Plus; and Enhance, a Mac to Mac Plus Upgrade for the 512E. SuperMac Software introduces Tape-Fit, a tape back-up system for the Macintosh™. Now shipping: SuperLaserSpool 1.2, Multi-User SuperLaserSpool, and SuperSpool, the ultimate in print spoolers; DiskFit 1.2 and network DiskFit, the fully automatic backup utility.	
Spectra Blue Assoc. 831-D North Park Ave. Tucson, AZ 85719	501	Star/Monogram 367 Van Ness Way Torrance, CA 90501	1141	Symmetry Corp. 761 E. University Mesa, AZ 85203	1431
Data Base solutions for Business and Personal use. Data Base Solutions that range from Medical and Dental office packages, Bill of Materials Inventory Control for Manufacturing Business, Complete Office Packages for Jewelers, Art Galleries, and general Retail Stores, Personal Time and Management Data Bases.		Star/Monogram will be showing Dollars and Sense, a personal and small business financial management program for the Macintosh. The program can be used in conjunction with another financial productivity product, Forecast, a tax planning and "what if?" estimating module. Both Dollars and Sense and Forecast will run on Macintosh computers including 128K systems, Macintosh Plus systems and the Macintosh SE.		Symmetry Corporation features two products, PictureBase, the Art Management System, and Acta, the outline processor desk accessory. The PictureBase Art Management System is designed for Desktop Publishers who incorporate graphics into documents they prepare. PictureBase is the first and only complete system which allows users to manage Macintosh graphics in an easy to use Library file system. Acta is designed for people who use the Macintosh to write. Use Acta to prepare and organize manuscripts, reports, journals, etc., and for almost any other kind of writing.	
Spectrum Digital Systems, Inc. 2702 International Ln., Ste. 112 Madison, WI 53704	1719				
Spectrum Digital Systems will introduce its TrueForm™ system, designed to fill out any form, using a Macintosh™. TrueForm uses Spectrum Digital's LS-300 Image Scanner to transmit a form's image to the screen. TrueForm software allows the user to "teach" the Mac to complete the form, identifying the form's blanks by pointing and clicking. Forms can be completed manually from the keyboard or via database merge. A full complement of spreadsheet-style functions are provided. Forms can be stored and edited repeatedly, and the complete form and contents can be printed on blank paper. Myriad other mindboggling features abound.

Great presentations start here:

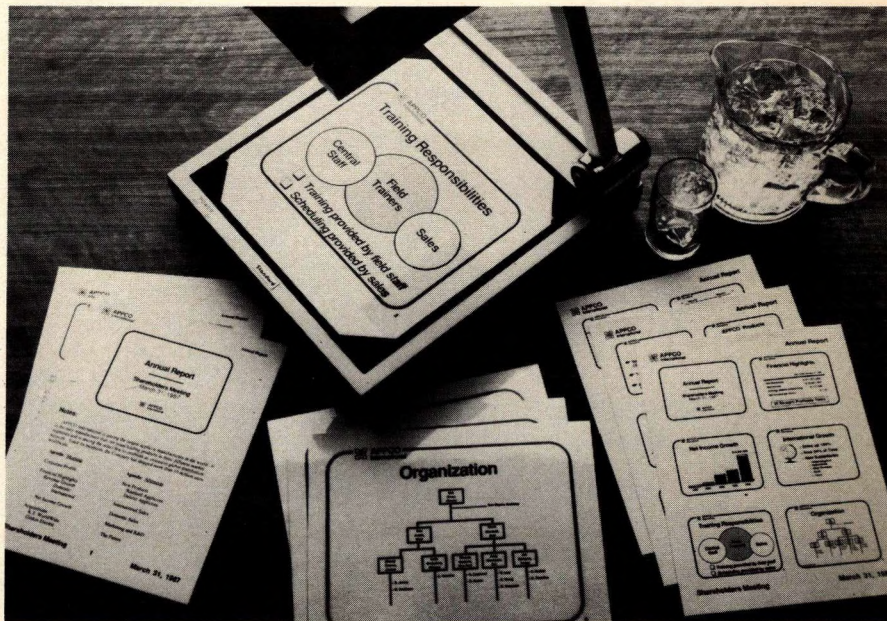

PowerPoint™ from Forethought.

Now you can put together the kind of presentations you've always wanted. Quickly. Easily.

Complete, professional presentations, whether it's for an unexpected sales meeting in 10 minutes, or the annual shareholder's meeting in a month.

With PowerPoint, you actually plan, compose and edit your entire presentation on your Macintosh™ computer. So you see exactly what you, and your audience, are going to see.

PowerPoint is the only presentation package that gives you everything you could want, the way you want it, when you want it — overheads, slides or flipcharts, plus speaker's notes and audience handouts.

It's like having an entire staff of writers, designers, typesetters, artists and a print shop all to yourself. But without the hassles and headaches.

If you make presentations, you must see PowerPoint! Come see us at **Booth #1246**. Directly across from Apple.

Conversion from other word processing formats is provided, as well as support of the DCA format.

Working Software, Inc.
321 Alvarado St., Ste. H
Monterey, CA 93940

1036

Working Software, Inc. already known for its award-winning Spellswell program, is introducing several new products. The Spellswell Medical Dictionary \$99.95. The Spellswell Legal Dictionary \$99.95. Findswell, \$49.95, is a document locator that installs itself into the "open box" of every program. Once a document or folder is located it can be opened with a click. Lookup, \$49.95, is a desk accessory for finding the spelling of a word. QuickLetter, \$99.95, is a desk accessory word processor specially designed for writing letters and addressing envelopes.

ZEDCOR, Inc.
4500 E. Speedway, Ste. 22
Tucson, AZ 85712

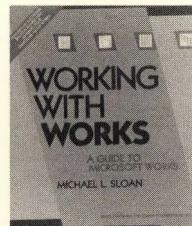

Booth #

127

Offering the New ZBasic™ 4.0 BASIC compiler and the incredible new DeskPAINT™ Desk Accessory. • DeskPAINT™ is a powerful new desk accessory that provides more power

than MacPaint without having to leave your application. Works with PageMaker™, Microsoft WORD™, MacWrite™ and more. • The ZBasic™ Compiler is totally revamped and offers the power of "C" or "PASCAL" with half the hassles.

Consult with an Expert for Around \$20.00

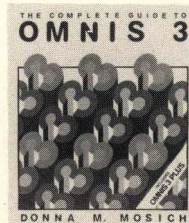

Working With Works

A Guide to Microsoft Works

by Michael L. Sloan

This unique, easy-to-follow guide is written for the first-time user—either of Works or the Macintosh. Covering all of Works' applications with step-by-step, hands-on experience and many business oriented examples, this book offers you a **special feature**: an electronic bulletin board created solely for readers of **Working With Works**. You use the bulletin board to learn Works' data communications application, and through the electronic mail feature, you can leave questions about Works for the author to answer. 320 pages, \$18.95, 18359-9.

The Complete Guide to Omnis 3

by Donna Mosich

This book picks up where the user's manual leaves off to help you master Omnis 3 or 3 Plus quickly and easily. Containing four complete database applications, this book begins the first application with a step-by-step tutorial for the beginning user. The three additional database applications cover the more advanced features, such as connected files and sequences, and all are supported by numerous helpful illustrations and examples, 352 pages, \$22.95, 18595-8.

NEW!

PageMaker

Desktop Publishing on the Macintosh

by Kevin Strehlo

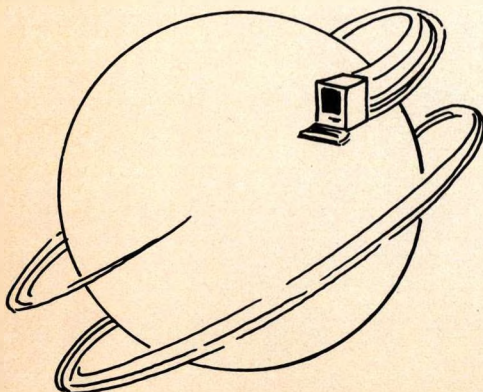

Featuring the latest version of PageMaker, this comprehensive guidebook bridges the gap between computing and publishing and shows you many ways to cut publication costs and decrease turn-around time. You'll find an entire range of knowledge—PageMaker expertise, design savvy, computer literacy, and printing and binding basics all included. Contains many illustrations, examples, and appendices that give you the hands-on guidance necessary to create effective layouts. 320 pages, \$21.95, 18764-0.

Do you want a Macintosh desktop publishing system?

Hire an expert team to guide you.

▼ The right system recommendation

Our extensive experience, from typesetting newspapers to owning and operating laser printing shops, enables us to recommend the system that best balances power and price.

▼ The lowest hardware prices

We can buy equipment for you at prices significantly lower than any retailer or mail order house.

▼ The best training and support

A consultant will work at your office full-time to train your staff and work out any problems immediately.

▼ Single source accountability

The same team handles needs analysis, purchasing, training, and support. One source for all answers.

(717) 491-2492, -2495

It's one thing to have great graphics. It's something else to make them move.

VideoWorks™ II for:

- Business Presentations
- Animated Slide Shows
- Multi-media Storyboards
- Educational Movies
- Entertaining Animations
- Suggested Retail Price \$195

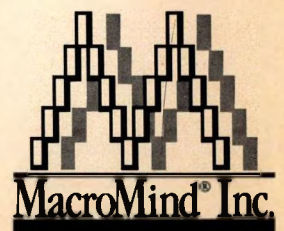

MacroMind has been making the Macintosh look great for years. Now let us make you look great with VideoWorks™ II! The Overview window creates slide shows that can include animation, wipes, fades, timers or sound. VideoWorks™ II works great with the Macintosh II (in either 16 or 256 colors) or the Macintosh 512, Plus, SE.

Create animation on your Macintosh with VideoWorks™ II. Take any artwork you have and create animated presentations, storyboards, educational courseware, point of sale displays or music-videos. From MacroMind® Inc., the creators of MusicWorks™, M.U.D.™, Art Grabber™, ComicWorks™, GraphicWorks™, Maze Wars+™.

Original VideoWorks owners can upgrade to VideoWorks II for \$100. Send your check, VISA or MC order along with your VideoWorks Movies disk.

VideoWorks II

VideoWorks™ II © 1987 MacroMind™ Inc., 1028 W. Wolfram St., Chicago, IL 60657 (312) 871-0987. Comes with three disks: Program & Tutorials, Clip Animation, Artwork & Movies and a Guided Tour training disk. Not copy protected. Distributed by Brøderbund Software. Ask your local dealer.

Put your Mac through analysis.

Lifting lug geometry.

Now you can perform serious desktop engineering analysis on your Macintosh. With MSC/pal. The leading finite element analysis package for personal computers, it gives you everything you need to perform 2-D and 3-D structural or mechanical analysis. And it's very easy to use, thanks to the familiar Macintosh user interface with pull-down menus and dialog boxes.

MSC/pal has analysis capability for static, normal modes, transient and frequency response. It features 3-D structure graphics that include animated deformed shapes and XY plots. Plus, there's a modern element library and a wide choice of applied loading types.

Thanks to an extensive manual and free tech-

nical support, MSC/pal is very easy to learn. And, it's easy to afford. Just \$995* for the 512K Mac version. \$1,495* for Mac Plus. So, who says stress analysis has to be stressful?

To order or to get more information, call or write our Product Service Center, 800-336-4858; in California, 213-259-3888.

**The
MacNeal-Schwendler
Corporation**

815 Colorado Blvd., Los Angeles, CA 90041

*Suggested retail, U.S. only.

MSC/pal is a trademark of The MacNeal-Schwendler Corporation. Macintosh is a trademark licensed to Apple Computer, Inc.

MacTilt® & MacTilt SE®

Professional Ergonomic Workstations for the Macintosh. See and feel the difference they make!

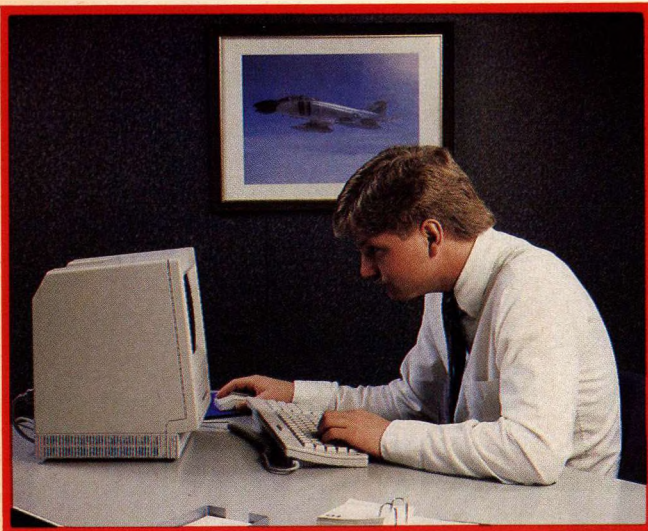

adjustability needed to reduce glare, and to ease eye, neck and back strain. Mounting clips assure stability yet allow instant portability.

MacTilt SE is designed especially for the Mac SE. The original MacTilt fits the 128K, 512K, and the Mac Plus. It comes standard with a universal drive bracket and is available in platinum or beige. Optional accessories include a security system, hard disk bracket, dust covers, etc. MacTilt and MacTilt SE are unit priced at \$89.95.

For the finest accessory available for your Mac, see your Apple dealer or contact:

ERGOTRON inc

In business environments where operators spend long hours in front of their computer, the Mac's small screen size and the low physical profile can cause physical discomfort and reduced productivity. A common solution to the low profile problem was to place the computer on top of a hard drive. This is no longer a solution for the Mac SE with its internal hard disk or the Mac Plus when used with a vertical hard drive or a file server.

Phone books, shoe boxes, and other creative ideas have been tried to bring the Mac up to eye level, but with little success.

MACTILT IS THE SOLUTION!

By raising the Mac 4 inches, providing 30° tilt, and 360° rotation, MacTilt provides the increased height and the

Makers of
Intermail

- ▶ Thinking of computerizing your business?
- ▶ Shopping for an AppleTalk network or additional Macintosh hardware?
- ▶ Looking for a dealer who can provide you with the first rate service and advice your company needs?

A P P L E T A L K

Spoken Here

Known as *Internet*, Interactive Network Technologies, Inc. is the oldest and most experienced Macintosh systems house in the industry. For almost five years we've been designing, installing and supporting AppleTalk networks and designing turnkey data systems for companies like yours.

A recognized leader in the field, we understand how to use Macintosh systems to dramatically increase your company's productivity, while making the process of planning, installation and employee training enjoyable. And affordable. In fact, you can even arrange to pay for your system as you reap its benefits.

So before you invest in a system, spend a little time. Call *Internet*. We'll get you the maximum return on your Macintosh dollar.

- ▶ Value added sales of Macintosh and Apple Desktop Communications products
- ▶ AppleTalk network leasing starting at \$99 per month
- ▶ Complete network planning, installation, and support services
- ▶ Comprehensive employee and administrator training
- ▶ Custom software and database design services

- ▶ **Get the answers you're looking for from experts who speak *your* language.**
- ▶ **Get the support you need by having a winning team in your corner!**

We put the talk into AppleTalk.™

Macworld. First then. First now.

MACWORLD The Macintosh Magazine

501 Second Street
San Francisco, CA 94107
415/546-7722

An IDG Communications Publication

Macworld hit the stands the same day the Macintosh hit the stores—January 24, 1984—and nothing in the personal computer industry has been the same since. Apple's vision prompted a long line of Macintosh-specific publications, but none measure up to the expertise and excellence of *Macworld*. We were first then, we're first now, and we'll continue to lead the way into the future of Macintosh technology.

Now Apple's introduction of the high-performance Mac II has opened up a new and colorful future—one in which a powerful computer and a multitude of intelligent coprocessor-based cards and peripherals has established a standard for the next generation of personal graphics workstations.

Macworld is the finely crafted tool you need to tune the Mac II—and the full Macintosh line—to peak performance. *Macworld* delivers the expert advice and exhaustive product reviews you need to get the most out of your machine. With our editors centered on one goal—to provide you with Mac-based solutions—*Macworld* helps turn your Macintosh into a profitable investment.

See why more than 175,000 readers turn to *Macworld*... a readership nearly one-third larger than our major competitor. Come to **Macworld Expo booth #806** for a free copy of the September issue. And take advantage of our special *show subscription rate*—just \$17.95 for one year (twelve issues). Subscription cards are available at the booth.

Macworld is an independent journal not affiliated with Apple Computer, Inc. Apple and the Apple logo are registered trademarks, and Mac, Macintosh, Macworld, and Macletter are trademarks of Apple Computer, Inc.
